CONTENTS

No. 1, January 1956

The Effect of Certain Sporulation Conditions on the Thermal Death Rate of *Bacillus coagulans* var. *thermoacidurans*. Hamed M. El-Bisi and Z. John Ordal ... 1–9

The Effect of Sporulation Temperature on the Thermal Resistance of *Bacillus coagulans* var. *thermoacidurans*. Hamed M. El-Bisi and Z. John Ordal ... 10–16

Temperature Synchronization of Nuclear and Cellular Division in *Bacillus megaterium*. M. Elizabeth Hunter-Szybalska, Waclaw Szybalski, and Edward D. DeLamater ... 17–24

Useful Criteria for the Identification of *Bacillus anthracis* and Related Species. Kenneth L. Burdon ... 25–42

The Characteristics of Lactate-Fermenting Sporeforming Anaerobes from Silage. M. P. Bryant and L. A. Burkey ... 43–46

Studies on the Growth of Species of *Actinomyces*. I. Cultivation in a Synthetic Medium with Starch. Arden Howell, Jr. and Leo Pine ... 47–53

Alteration in Flagellar Morphology Induced by Specific Anti-Flagellar Serum. Nicholas J. Menolasino, Milton Goldin, and Ann Hoffman ... 54–59

Escherichia coli Containing Unnatural Pyrimidines in its Deoxyribonucleic Acid. Stephen Zamenhof, Rosalie De Giovanni, and Kenneth Rich ... 60–69

A New Procedure for Assay of Bacterial Hydrogenases. Harry D. Peck, Jr. and Howard Gest ... 70–80

Transamination of Amino Acids with Glyoxylic Acid in Bacterial Extracts. L. Leon Campbell, Jr. ... 81–83

The Nature of the Binding of Penicillin by Bacterial Cells. Saul A. Schepartz and Marvin J. Johnson ... 84–90

Microbiological Activities of Compounds Related to Vitamin B_{12}. Barbara Hoevet Peterson, Barbara Hall, and O. D. Bird ... 91–93

An Intracellular Hemolysin of Group A Streptococci. I. Influence of Sonic Energy and pH on Hemolytic Potency. John H. Schwab ... 94–99

An Intracellular Hemolysin of Group A Streptococci. II. Comparative Properties of Intracellular Hemolysin, Streptolysin S′, and Streptolysin O. John H. Schwab ... 100–107

Amino Acid Interrelationships in Certain Leucine- and Aromatic-Requiring Strains of *Neurospora crassa*. Raymond W. Barratt, R. Clinton Fuller, and Stuart W. Tanenbaum ... 108–114

Studies on Pigmentation of *Serratia marcescens*. I. Spectral and Paper Chromatographic Properties of Prodigiosin. Robert P. Williams, James A. Green, and Donald A. Rappoport ... 115–120

Notes:

Effect of Iron Concentration in the Medium on Phage and Toxin Production in a Lysogenic, Virulent *Corynebacterium diphtheriae*. Motoichi Hatano ... 121–122

Effect of Cysteine on Growth of *Streptococcus faecalis* in Over-Autoclaved Media. E. Staten Wynne and Cora L. Gott ... 122–123

Use of Membrane Filters in the Measurement of Biological Incorporation of Radioactive Isotopes. Daniel E. Atkinson and Bruce A. McFadden ... 123–124

The Effect of Incubation Time on Macrocolony Formation After X-Irradiation of Microorganisms. Shirley E. Gunter and Henry I. Kohn ... 124–125

Aerobic Cultivation of *Clostridium tetani* in the Presence of Cobalt. G. A. Dedie and O. G. Koch ... 126

Removal of Bacterial Cells from Liquid Media Using a Foerst Continuous-Type Centrifuge. Owen B. Weeks and Sidney M. Beck ... 127–128

No. 2, February 1956

Effect of Folic Acid Analogues on Growth and Cell Division of Nonexacting Microorganisms. Walter J. Nickerson and Michael Webb ... 129–139

Differential Reversal of Inhibitory Effects of Folic Acid Analogues on Growth, Division, and Deoxyribonucleic Acid Synthesis of Microorganisms. Michael Webb and Walter J. Nickerson 140–148
The Relation of Growth to the Lethal Damage Induced by Ultraviolet Irradiation in *Escherichia coli*. Hazel D. Barner and Seymour S. Cohen 149–157
Parasporal Bodies of Bacillus Spores. J. W. Bartholomew and Paul Clare 158–161
Germination of Spores of Certain Aerobic Bacilli Under Anaerobic Conditions. Norman G. Roth and David H. Lively 162–166
Characterization of Dextrans from Four Types of *Leuconostoc mesenteroides*. Allene Jeanes, W. C. Haynes, and C. A. Wilham 167–173
Biochemistry of Filamentous Fungi. II. The Quantitative Significance of an "Oxidative Pathway" During the Growth of *Penicillium chrysogenum*. E. C. Heath and Henry Koffler 174–181
The Incidence of Thermophilic Bacteria in Arctic Soils and Waters. R. H. McBee and Virginia H. McBee 182–185
Identity of Thermophilic Bacteria Isolated from Arctic Soils and Waters. R. H. McBee and Lorraine P. Gaugler 186–187
Relation Between Bacteremia and Death in Mice Following X-Ray and Thermal Column Exposures. Irene U. Boone, Kent T. Woodward, and Payne S. Harris 188–195
Metabolism of Carbohydrates by *Pseudomonas saccharophila*. I. Oxidation of Fructose by Intact Cells and Crude Cell-Free Preparations. Michael Doudoroff, Norberto J. Palleroni, Joseph MacGee, and Margaret Ohara 196–201
Metabolism of Carbohydrates by *Pseudomonas saccharophila*. II. Nature of the Kinase Reaction Involving Fructose. Norberto J. Palleroni, Rebecca Contopoulou, and Michael Doudoroff 202–207
The Role of High Electrolyte Concentration in the Production and Growth of L Forms of Bacteria. L. Dienes and John T. Sharp 208–213
Probit Analysis Applied to *Salmonella pullorum* Survival Data. William Dowell Baten and H. J. Stafseth 214–216
The Demonstration of Substances in Human Sera Which Inhibit Complement Fixation in Antigen-Antibody Systems of Lymphogranuloma Venereum, Psittacosis, Mumps, Q Fever, and Lymphocytic Choriomeningitis. Nathalie J. Schmidt and Harry B. Harding 217–222
Investigation of the Specificity of Substances in Some Human Sera Which Are Inhibitory in Certain Viral and Rickettsial Complement-Fixing Antigen-Antibody Systems. Nathalie J. Schmidt and Harry B. Harding 223–228
Further Studies of the Phenomenon of Capsular Swelling of *Micrococcus pyogenes* var. *aureus* in the Presence of Immune Serum. Katherine Mills Price and Yale Kneeland, Jr. 229–230
Effects of Illumination on Plaque Formation by *Escherichia coli* Infected with T1 Bacteriophage. Ruth F. Hill 231–235
Studies on *Streptococcus pyogenes*. I. Observations on the Microscopical and Biological Aspects of the Disintegration and Solubilization of a Type 6 Strain by Sonic Oscillation. Hutton D. Slade and Jeanette K. Vetter 236–243
Observations on the Respiratory Activity of Certain Obligately Halophilic Bacteria with High Salt Requirements. H. Katznelson and J. Robinson 244–249
Notes:
Inhibitory Effect of Sodium Bicarbonate and Sodium Carbonate on Spore Germination of *Bacillus subtilis*. Yoetsu Hachisuka, Nobuo Kato, and Nobuo Asano 250–251
A Selective Medium for the Isolation of *Vibrio fetus* and Related Vibrios. C. D. Kuzdas and E. V. Morse 251–252
Intracellular Distribution of Tricarboxylic Acid Cycle Enzymes in *Azotobacter vinelandii*. Martin Alexander and P. W. Wilson 252–253
The Induced Formation of Nitrate Reductase in Auxotrophic Mutants of *Escherichia coli*. S. D. Wainwright and Ann Nevill 254–255
Filament Formation by *Lactobacillus leichmannii* When Desoxyribosides Replace Vitamin B_{12} in the Growth Medium. R. H. Deibel, Mancourt Downing, C. F. Niven, Jr., and B. S. Schweigert 255–256

No. 3, March 1956

The Effects of Spray-Drying on the Viability of Fungous Spores. Peter Mazur and William H. Weston 257–266
Nutritional Requirements of Some Putrefactive Anaerobic Bacteria. L. Leon Campbell, Jr. and Hilmer A. Frank 267–269
The Host-Parasite Relationship in Tularemia. III. The Influence of *Pasturella tularensis* on Enzymes Involved in Amino Acid Metabolism in Tissues of White Rats. John M. Woodward and Mary W. Mayhew 270–273
Studies on the Metabolism of the Treponemata. II. Transamination in the Reiter Treponeme. Stanley Barban 274–277
Studies on the Inhibition of Growth of *Escherichia coli* by Normal Aminobutyric Acids. Samuel Friedman 278–284
A Study of Bacterial Substances Stainable by the Hydrogen Chloride Method. H. L. Chance 285–289
Hybridization Studies Involving *Saccharomyces lactis* and *Zygosaccharomyces ashbyi*. Lynferd J. Wickerham and Kermit A. Burton 290–295
Hybridization Studies Involving *Saccharomyces fragilis* and *Zygosaccharomyces dobzhanskii*. Lynferd J. Wickerham and Kermit A. Burton 296–302
Bacterial Decomposition of 2,4-Dichlorophenoxyacetic Acid. Martin H. Rogoff and James J. Reid 303–307
The Metabolism of Species of Streptomyces. IX. Metabolism of Pentose and Hexose Phosphates. Vincent W. Cochrane and Philip L. Hawley 308–314
The Density and Size of Air-Borne *Serratia marcescens*. Clyde Orr, Jr. and Mendel T. Gordon 315–317
Studies on a Mutant of *Escherichia coli* with Unbalanced Ribonucleic Acid Synthesis. Ernest Borek, Joyce Rockenbach, and Ann Ryan 318–323
Studies on the Physiology of Virulence of *Pasturella tularensis*. II. Serine Deaminase and Transaminase Activity. Dorothy E. Fleming and Lee Foshay 324–327
Mutants Recovered After Exposure of *Streptomyces venezuelae* to X-rays. Ralph B. Gwatkin and David Gottlieb 328–332
Characteristics of Organisms Isolated from the Rumen of Cows Fed High and Low Roughage Rations. H. E. Bauman and E. M. Foster 333–338
A Biochemical Test for Separating Paracolon Groups. Philip R. Carlquist 339–341
Differentiation of Resistant Mutants by Infrared Analysis. Frederick C. Kull and Madelon R. Grimm 342–347
Electron Microscopy of Ultra-thin Sections of Bacteria. II. Sporulation of *Bacillus megaterium* and *Bacillus cereus*. George B. Chapman 348–355
The Presence of Aconitase and "Aconitic Hydrase" in *Aspergillus niger*. Nora E. Neilson 356–361
T-Form Colonies of Pleuropneumonialike Organisms. Maurice C. Shepard 362–369
Persistence of Individual Strains of *Escherichia coli* in Man and Dog Under Varying Conditions. H. J. Sears, Helen Janes, Richard Saloum, Inez Brownlee, and L. F. Lamoreaux 370–372
Degradation of Dextrans by Enzymes of Intestinal Bacteria. Theodore W. Sery and Edward J. Hehre 373–380
Notes:
Capillary Tube Method for Counting Viable Bacteria. Tomomichi Yanagita 381–382
Partial Purification of Cellulase from a Wood-rotting Basidiomycete. Harry H. Higa, R. D. O'Neill and M. W. Jennison 382

No. 4, April 1956

Obituary—Robert S. Breed. H. J. Conn 383–384
The Pathways of Glucose Dissimilation by *Microbacterium lacticum*. P. J. Vandemark and W. A. Wood 385–392
Morphological and Physiological Characteristics of the Genus *Chromobacterium*. Einar Leifson 393–400
The Nature of Some Growth Stimulatory Substances for *Lactobacillus delbrueckii*. Miyoshi Ikawa and Jean S. O'Barr 401–405

Response of *Escherichia coli* to Ferrous Ions. III. Application of a Method for Estimating Cellular Division to a Study of Recovery and Mutation. B. Wesley Catlin 406–416
Anoxia as a Major Factor Causing Population Changes in Antiserum-Containing Cultures. Werner Braun, Robert Altenbern, James Kelsh, and Howard Sandoval 417–420
Aureomycin-Resistant Cell-Free Nitro Reductase from Aureomycin-Resistant *Escherichia coli*. Arthur K. Saz, L. Weiss Brownell, and Rita B. Slie 421–424
A Cyclic Pathway for the Bacterial Dissimilation of 2,3-Butanediol, Acetylmethylcarbinol, and Diacetyl. I. General Aspects of the 2,3-Butanediol Cycle. Elliot Juni and Gloria A. Heym 425–432
Labile Citrovorum Factor in Urine. Milton Silverman and Rita C. Gardiner 433–438
Inhibitor Studies of Diphtherial Succinic Dehydrogenase. Norman Strauss and Gregory J. Jann 439–442
Threonine Deamination in *Escherichia coli*. I. D- and L-Threonine Deaminase Activities of Cell-Free Extracts. H. Edwin Umbarger and Barbara Brown 443–449
Electron Microscopical Studies of Ultrathin Sections in *Penicillium chrysogenum*. Seizo Tsuda 450–453
Studies on the Biosynthesis of the M-Protein of Group A Hemolytic Streptococci. Eugene N. Fox and Lester O. Krampitz 454–461
A Phase Contrast Study of the Chromatinic Bodies of *Escherichia coli* Subsequent to Ultraviolet Irradiation. J. R. Cortelyou, L. M. Amundson, and M. A. McWhinnie 462–473
Nuclear Division as Observed in Live Bacteria by a New Technique. Donald J. Mason and Dorothy M. Powelson 474–479
A Plating Technique for Screening Intestinal Coliform Bacteria. Ralph F. Wiseman and William B. Sarles 480–481
A Study of Lysis in Bacteriophage-Infected *Escherichia coli*. Arthur Brown 482–490
Notes:
The Effect of Various Chemical Agents on Eastern Equine Encephalomyelitis Virus. Matthew A. Bucca 491–492
Pink Yeasts Isolated from Human Skin Surfaces. M. Joan Huxley and R. C. Hurd 492–493
Effect of Prolonged Incubation of *Escherichia coli* on the Production of Phage T_1. Ruth F. Hill 493–495
A Medium Promoting Rapid Quantitative Sporulation in *Clostridium perfringens*. Paul D. Ellner 495–496
Levels of Certain Free Amino Acids of Chorio-Allantois During Influenza Virus Infection. Clarence A. Johnson, John E. Kempf, and Olaf Bergeim 496–497
Conjugal Pairing in *Escherichia coli*. Joshua Lederberg 497–498
Preservation of *Diplococcus pneumoniae*. Eugene C. Pirtle 498–499
Visualizing Bacterial Cells for Direct Microscopic Counting on the Millipore Filter, Hydrosol Type. A. J. Shanahan, R. E. Fornwald, D. M. Chapman, and A. N. Beachley 499–500
The Relation of Population Heterogeneity to the Plateau Phenomenon in Radiation Dose-Response Curves. David D. Pittman 500–501

No. 5, May 1956

Effect of the Buffer on the Response of *Streptococcus faecalis* to Purine Bases. Frank M. Maciasr 503–504
Quantitative Studies on Influenza Virus Infection of the Chick Embryo by the Amniotic Route. Georges H. Werner 505–515
Studies of a Bacteriophage Active Against a Chromogenic Neisseria. R. L. Stone, C. G. Culbertson, and H. M. Powell 516–520
Alterations in the Nitrogen Excretion Pattern of Chicks Infected with *Salmonella pullorum*. R. T. Ross, D. Frank Holtman, and R. F. Gilfillan 521–524
Shigella boydii Serotypes in Egypt. Thomas M. Floyd 525–529

Enhancement of Virulence of *Malleomyces pseudomallei*. Clara Nigg, John Ruch, Eva Scott, and Kathryn Noble 530–541
Physical Methods for Obtaining Synchronous Culture of *Escherichia coli*. Yoichi Maruyama and Tomomichi Yanagita 542–546
Electron Microscopic Study of Phagocytosis of Staphylococcus by Human Leukocytes. Joseph R. Goodman and Roger E. Moore 547–556
Hexitol Metabolism in *Escherichia coli*. John B. Wolff and Nathan O. Kaplan 557–564
The Oxidation of Compounds Related to the Tricarboxylic Acid Cycle by Whole Cells and Enzyme Preparations of *Mycobacterium tuberculosis* var. *Hominis*. Anne S. Youmans, Irving Millman, and Guy P. Youmans 565–570
The Effect of X-rays on the Survival of Bacteria and Yeast. I. A Comparative Study of the Dose-Survival Curves of *Azotobacter agile*, *Escherichia coli*, *Pseudomonas fluorescens*, *Rhodopseudomonas spheroides*, and *Saccharomyces cerevisiae* Irradiated in the Resting State. Shirley E. Gunter and Henry I. Kohn 571–581
Factors Influencing Utilization of the Stereoisomers of Homocystine by Brucella. C. E. Lankford, L. J. Rode, and V. T. Schuhardt 582–587
Studies on the Induction of Thymine Deficiency and on the Effects of Thymine and Thymidine Analogues in *Escherichia coli*. Seymour S. Cohen and Hazel D. Barner 588–597
Succinic Acid Decarboxylation System in *Propionibacterium pentosaceum* and *Veillonella gazogenes*. I. Activation, Decarboxylation, and Related Reactions. E. A. Delwiche, E. F. Phares, and S. F. Carson 598–603
Succinic Acid Decarboxylation System in *Propionibacterium pentosaceum* and *Veillonella gazogenes*. II. Evidence for an Active "C_1" Complex. E. F. Phares, E. A. Delwiche, and S. F. Carson 604–610
Dark Reactivation in Ultraviolet Irradiated *Escherichia coli*. Robert L. Charles and Leonard N. Zimmerman 611–616
Morphological and Physiological Considerations of Colonial Variants of *Pseudomonas aeruginosa*. Clarence K. Williamson 617–622
Notes:
Resazurin Staining of Bacterial Colonies on Membrane Filters. Charles H. Carter, Andrew J. Gaspar, and Joshua M. Leise 623
Sonic Oscillation as an Aid in the Counting of Group A Streptococci by the Pour-Plate Method. Hutton D. Slade and William C. Slamp 624–625
The Preservation of Bacteria by Freezing in Glycerol Broth. Dexter H. Howard 625

No. 6, JUNE 1956

Urea-hydrolyzing Bacilli. I. A Physiological Approach to Identification. G. H. Bornside and R. E. Kallio 627–634
Oxidative Activity and Nitrogen Fixation in Cell-free Preparations from *Azotobacter vinelandii*. Wayne E. Magee and R. H. Burris 635–643
Studies on the Methane Fermentation. XII. The Pathway of Hydrogen in the Acetate Fermentation. Martin J. Pine and H. A. Barker 644–648
D-Erythrose Metabolism in a Strain of *Alcaligenes faecalis*. Howard H. Hiatt and B. L. Horecker 649–654
Urea-hydrolyzing Bacilli. II. Nutritional profiles. G. H. Bornside and R. E. Kallio 655–660
Nutrition and Metabolism of Marine Bacteria. II. Observations on the Relation of Sea Water to the Growth of Marine Bacteria. Robert A. MacLeod and E. Onofrey 661–667
Effect of Hydrostatic Pressure on the Succinic Dehydrogenase System in *Escherichia coli*. Richard Y. Morita and Claude E. Zobell 668–672
Production of a Mutant-specific Bactericide by the Action of Penicillin on *Escherichia coli*. Thomas J. Bird and Joseph S. Gots 673–676
The Dependence of Nucleic Acid Syntheses on the Presence of Amino Acids in *Escherichia coli*. Arthur B. Pardee and Louise S. Prestidge 677–683
Synthesis and Secretion of Invertase in Relation to the Growth of *Myrothecium verrucaria*. G. R. Mandels 684–688

Studies on the Cytochemistry of Bacteria. Abraham Widra 689–702
Individual Constancy of Numbers among the Oral Flora. Frederick W. Kraus and Carolyn Gaston 703–707
Metabolic Studies of Rickettsiae. III. Studies of Transamination, Oxidative Phosphorylation and Glutamate-2-C^{14} Incorporation by Purified Suspensions of Rickettsia mooseri. Hope E. Hopps, Fred E. Hahn, Charles L. Wisseman, Jr., Elizabeth B. Jackson, and Joseph E. Smadel 708–716
The Carbon Dioxide Requirement of *Neisseria gonorrhoeae*. Philip J. Griffin and Efraim Racker 717–721
Antigenic Relationships and Toxicity of Mucinolytic Preparations from *Vibrio comma* and Related Vibrios. Manohar Lal Chugh, Keith E. Jensen, and Pearl L. Kendrick 722–727
Inhibitory Effect of Grid Imprints on Growth of *Pasteurella tularensis* on Membrane Filters. Andrew J. Gaspar and Joshua M. Leise 728–731
Enzyme Systems in the Mycobacteria. I. The Isocitric Dehydrogenase. Dexter S. Goldman 732–736
Notes:
Particulate Oxidase Systems in *Acetobacter suboxydans*. Carl Widmer, Tsoo E. King, and Vernon H. Cheldelin 737
Virulence Enhancement of a Filamentous Strain of *Candida albicans* After Growth on Media Containing Cysteine. Seymour Winsten and T. J. Murray 738
The Bacterial Flora of the Common Gartersnake, *Thamnophis sirtalis sirtalis*. Stephen E. Mergenhagen 739

INDEX OF AUTHORS[1]

Alexander, Martin, 252
Altenbern, Robert, 417
Amundson, L. M., 462
Asano, Nobuo, 250
Atkinson, Daniel E., 123

Barban, Stanley, 274
Barker, H. A., 644
Barner, Hazel D., 149, 588
Barratt, Raymond W., 108
Bartholomew, J. W., 158
Baten, William Dowell, 214
Bauman, H. E., 333
Beachley, A. N., 499
Beck, Sidney M., 127
Bergeim, Olaf, 496
Bird, O. D., 91
Bird, Thomas J., 673
Boone, Irene U., 188

Acetate fermentation, transfer of methyl group to methane in, 644
Acetic acid, metabolism of, by *Mycobacterium tuberculosis*, 565
Acetobacter suboxydans, oxidase systems in, 737
Acetylmethylcarbinol, bacterial dissimilation of, 425
Aconitase in *Aspergillus niger*, 356
—, presence of, in *Azotobacter vinelandii*, 252
"Aconitic hydrase" in *Aspergillus niger*, 356
Actinomyces israeli, nutrition of, 47
— *naeslundi*, nutrition of, 47
Actinomycetes, X-ray induced mutations in, 328
Aerobacter cloacae in gartersnake, 739
Alanine, metabolism of, by *Mycobacterium tuberculosis*, 565
Alcaligenes faecalis, erythrose metabolism in, 649
— — in gartersnake, 739
Algae, blue-green, method for staining nuclear material in, 285
Amino acid interrelationships in *Neurospora crassa*, 108
D-Amino acid oxidase, effect of tularemia in rats on activity of liver, 270
Amino acids in chorio-allantois during influenza virus infection, 496
— — in *Escherichia coli*, dependence of nucleic acid syntheses on, 677
— —, requirements of, for putrefactive anaerobes, 267
— —, transamination of, with glyoxylic acid in bacterial extracts, 81
Aminobutyric acids, inhibition of *Escherichia coli* by, 278
Aminopterin, effect of, on growth of microorganisms, 129, 140
Anaerobes from silage, lactate-fermenting spore-forming, 43
Anaerobes, nutrition of putrefactive, 267
Anaerobiosis, effect of, on germination of spores of aerobic bacilli, 162
Anoxia, effect of, on population changes with brucella, 417
Antibiotics, resistance patterns of bacteria to, 342
Anti-flagellar serum, alteration in flagellar morphology by, 54
Antigenic relationships and toxicity of mucinolytic preparations from *Vibrio comma*, 722
Arctic soils and waters, thermophilis bacteria in, 182, 186
Arizona group of paracolon bacteria, characteristics of, 339
Aspergillus flavus, effect of spray-drying on viability of spores of, 257
— *niger*, aconitase and "aconitic hydrase" in, 356
Assay of vitamin B_{12} by microorganisms, 91
Aureomycin, *see also* chlortetracycline
Azotobacter agile, effect of x-rays on survival of, 571
— *vinelandii*, oxidative activity and nitrogen fixation in cell-free preparations of, 635
— *vinelandii*, tricarboxylic acid cycle enzymes in, 252

BCG strain of *Mycobacterium tuberculosis*, infrared absorption spectra of, 342
Bacillus alvei, criteria for identification of, 25
— *anthracis*, criteria for identification of, 25
— —, germination of spores of, under anaerobic conditions, 162
— *brevis*, criteria for identification of, 25
— *cereus*, criteria for identification of, 25
— —, effect of folic acid analogues on growth of, 129
— —, nuclear division in, 474
— —, sporulation of, electron microscopy of, 348
— *circulans*, criteria for identification of, 25
— *coagulans*, criteria for identification of, 25
— —, presence of, in Arctic soils and waters, 182, 186
— — var. *thermoacidurans*, effect of environment on thermal death rate of, 1, 10
— *firmus*, criteria for identification of, 25
— *freudenreichii*, physiology of, 627, 655
— *laterosporus*, criteria for identification of, 25
— *lentus*, criteria for identification of, 25
— —, physiology of, 627, 655
— *licheniformis*, criteria for identification of, 25
— —, presence of, in Arctic soils and waters, 182, 186
— *loehnisii*, physiology of, 627, 655
— *macerans*, criteria for identification of, 25
— *megaterium*, criteria for identification of, 25
— —, cytochemistry of, 689
— —, effect of folic acid analogues on growth of, 129, 140
— —, germination of spores of, under anaerobic conditions, 162
— —, infrared absorption spectra of, 342
— —, parasporal bodies of, 158
— —, sporulation of, electon microscopy of, 348
— —, temperature synchronization of nuclear and cellular division in, 17
— *mycoides*, criteria for identification of, 25
— *pantothenticus*, nutrition of, 655
— *pasteurii*, physiology of, 627, 655
— *polymyxa*, criteria for identification of, 25
— *pumilus*, criteria for identification of, 25

— *sphaericus*, criteria for identification of, 25
— —, physiology of, 627, 655
— *stearothermophilus*, presence of, in Arctic soils and waters, 182, 186
— *subtilis*, criteria for identification of, 25
— —, inhibition of sodium carbonate on spore germination of, 250
— —, parasporal bodies of, 158
— — var. *niger*, germination of spores of, under anaerobic conditions, 162
Bacteremia and death in mice following x-ray and thermal column exposures, 188
Bactericide, mutant-specific, production of, by action of penicillin on *Escherichia coli*, 673
Bacteriophage for chromogenic neisseria, 516
—infected *Escherichia coli*, lysis in, 482
— T1, plaque formation by *Escherichia coli* infected with, 231
— —, production of, by *Escherichia coli*, 493
Bacterioides species, degradation of dextrans by enzymes of, 373
Basidiomycete, cellulase from a wood-rotting, 382
Bethesda-Ballerup group of paracolon bacteria, characteristics of, 339
Biochemistry of filamentous fungi, 174
Biotin, requirements of, for putrefactive anaerobes, 267
Breed, Robert Stanley, necrology of, 383
5-Bromouracil, effect of, on metabolism of *Escherichia coli*, 588
—, introduction of, in deoxyribonucleic acid of *Escherichia coli*, 60
Brucella abortus, effect of anoxia on, 417
— *melitensis*, utilization of homocystine by, 582
— *suis*, effect of anoxia on, 417
— —, utilization of homocystine by, 582
Buffer, effect of, on response of *Streptococcus faecalis* to purine bases, 503
2,3-Butanediol, bacterial dissimilation of, 425

Candida albicans, effect of cysteine on virulence of, 738
— *tropicalis*, effect of folic acid analogues on growth of, 129, 140
Capsular swelling of *Micrococcus pyogenes* var. *aureus*, 229
Carbohydrates, metabolism of, by *Pseudomonas saccharophila*, 196, 202
Carbon dioxide requirement of *Neisseria gonorrhoeae*, 717
Cellular and nuclear division in *Bacillus megaterium*, temperature synchronization of, 17
Cellulase from a wood-rotting basidiomycete, 382
Centrifuge, Foerst continuous-type, use of, in bacteriology, 127
Chemical agents, effect of, on Eastern equine encephalomyelitis virus, 491
Chick embryo, influenza virus infection of, 505
Chicks infected with *Salmonella pullorum*, nitrogen excretion of, 521
Chloromycetin, effect of, on nucleic acid synthesis by *Escherichia coli*, 677
Chlortetracycline, mode of action of, 421
—, *see also* aureomycin.
Chorio-allantois, amino acids in during influenza virus infection, 496
Chromatinic bodies of *Escherichia coli*, effect of ultraviolet irradiation on, 462
Chromatographic properties of prodigiosin, 115
Chromobacterium ianthinum, characteristics of, 393
— *laurentium*, characteristics of, 393
— *manilae*, characteristics of, 393
— *violaceum*, characteristics of, 393
Citrovorum factor in urine, 433
Clostridium butylicum, hydrogenase of, 70
— *parabotulinum*, nutrition of, 267
— *pasteurianum*, hydrogenase of, 70
— *perfringens*, medium for sporulation in, 495
— *sporogenes*, nutrition of, 267
— *tetani*, aerobic cultivation of, in presence of cobalt, 126
— *tyrobutyricum* from grass silage, 43
Cobalt, aerobic cultivation of *Clostridium tetani* in presence of, 126
Coliform bacteria, plating technique for screening, 480
Colonial variants of *Pseudomonas aeruginosa*, 617
Colonies on membrane filters, resazurin staining of, 623
Conjugal pairing in *Escherichia coli*, 497
Corynebacteria, nutrition of marine, 661
Corynebacterium diphtheriae, effect of iron on phage and toxin production by, 121
— —, inhibition of succinic dehydrogenase from, 439
— species, decomposition of 2,4-dichlorophenoxyacetic acid by, 303
Counting bacteria on millipore filter, 499
— streptococci by pour-plate method, 624
— viable bacteria, capillary tube method for, 381
Cows, rumen of, bacteria in, 333
Cysteine, effect of, on growth of *Streptococcus faecalis*, 122
—, — of, on virulence of *Candida albicans*, 738
Cytidylic acid, promotion of growth of *Lactobacillus delbrueckii* by, 401
Cytochemistry of *Bacillus megaterium*, 689
— — *Escherichia coli*, 689
Cytochrome oxidase, presence of, in *Azotobacter vinelandii*, 252

Deamination of threonine in *Escherichia coli*, 443
Death rate of *Bacillus coagulans* var. *thermoacidurans*, effect of factors on thermal, 1, 10

Dehydrogenase, glutamic acid, from cell-free preparations of *Azotobacter vinelandii*, 635
—, isocitric, in *Mycobacterium tuberculosis*, 732
—, succinic, effect of hydrostatic pressure on, in *Escherichia coli*, 668
Density of air-borne *Serratia marcescens*, 315
Deoxyribonucleic acid of *Escherichia coli*, unnatural pyrimidines in, 60
— —, synthesis of, by microorganisms, effect of folic acid analogues on, 140
Desoxyribosides, filament formation by *Lactobacillus leichmannii* in presence of, 255
Desulfovibrio desulfuricans, hydrogenase of, 70
Deuterium-labeled acetate, fermentation of, 644
Dextranases in *Bacteroides* species, 373
Dextrans, characterization of, from *Leuconostoc mesenteroides*, 167
—, degradations of, by enzymes of intestinal bacteria, 373
Diacetyl, bacterial dissimilation of, 425
Dichloroaminopterin, effect of, on growth of microorganisms, 129, 140
2,4-Dichlorophenoxyacetic acid, bacterial decomposition of, 303
9,10-Dimethylfolic acid, effect of, on growth of microorganisms, 129
Diphtherial succinic dehydrogenase, inhibition of, 439
Diphtheroids, L forms of, role of electrolytes in growth of, 208
Diplococcus pneumoniae, preservation of, 498
Division of microorganisms, effect of folic acid analogues on, 129, 140
Dogs, persistence of individual strains of *Escherichia coli* in, 370
Drying, effect of, on viability of fungous spores, 257
Dulcitol, metabolism of, by *Escherichia coli*, 557

Eastern equine encephalomyelitis virus, effect of chemical agents on, 491
Egypt, serotypes of *Shigella boydii* in, 525
Electrolytes, role of, in production and growth of L forms of bacteria, 208
Electron micrographs of conjugal pairing in *Escherichia coli*, 497
— — of parasporal bodies on bacillus spores, 158
— — of *Penicillium chrysogenum*, 450
— — of phagocytosis of *Staphylococcus aureus*, 547
— — of *Streptococcus pyogenes* treated with sonic oscillation, 236
— — of ultra-thin sections of *Bacillus cereus* and *Bacillus megaterium*, 348
— microscopy of sporulation of *Bacillus megaterium* and *Bacillus cereus*, 348
Enzyme systems in Mycobacteria, 732
Erythrose metabolism in *Alcaligenes faecalis*, 649
—4-phosphate, formation of by *Alcaligenes faecalis*, 649
Escherichia coli, amino acids in, dependence of nucleic acid syntheses on, 677
— —, assay of vitamin B_{12} by, 91
— —, chromatinic bodies of, phase contrast study of, 462
— —, conjugal pairing in, 497
— —, cytochemistry of, 689
— —, dark reactivation in ultraviolet irradiated, 611
— —, effect of folic acid analogues on growth of, 129, 140
— —, effect of hydrostatic pressure on succinic dehydrogenase in, 668
— —, effect of methionine on synthesis of ribonucleic acid by, 318
— —, effect of ultraviolet irradiation on chromatinic bodies of, 462
— —, effect of x-rays on survival of, 571
— —, hexitol metabolism in, 557
— —, hydrogenase of, 70
— — in gartersnake, 739
— —, induced formation of nitrate reductase in mutants of, 254
— — infected with T1 bacteriophage, effect of illumination on plaque formation by, 231
— —, inhibition of, by aminobutyric acid, 278
— —, lysis in bacteriophage-infected, 482
— —, method for staining nuclear material in, 285
— —, methods for synchronous culture of, 542
— —, nitro reductase from, studies on, 421
— —, nuclear division in, 474
— —, persistence of individual strains of, in man and dog, 370
— —, production of bacteriophage T1 by, 493
— —, production of mutant-specific bactericide by penicillin acting on, 673
— —, relation of growth to lethal damage induced by ultraviolet irradiation of, 149
— —, response of, to ferrous ions, 406
— —, ribonucleic acid synthesis by a mutant of, 318
— —, threonine deamination in, 443
— —, thymine deficiency in, 588
— —, unnatural pyrimidines in deoxyribonucleic acid of, 60

Ferrous ions, response of *Escherichia coli* to, 406
Filamentation of microorganisms, effect of folic acid analogues on, 129, 140
Flagellar morphology, alteration in, by specific anti-flagellar serum, 54
Flavobacterium, nutrition of marine, 661
Foerst continuous-type centrifuge, use of, in bacteriology, 127
Folic acid, assimilation of, by *Streptococcus faecalis*, 503

— —, effect of, on growth of microorganisms, 129, 140
— —, nutrition of *Leuconostoc citrovorum* and, 433
— —, *see also* Pteroylglutamic acid
Fructose-1,6-diphosphate, metabolism of, by *Streptomyces coelicolor*, 308
—, metabolism of, by *Pseudomonas saccharophila*, 196, 202
— 1,6-phosphate, dissimilation of, by *Microbacterium lacticum*, 385
Fumarase, presence of, in *Azotobacter vinelandii*, 252
Fungi, biochemistry of filamentous, 174
Fungous spores, effect of spray-drying on viability of, 257

Gartersnake, bacterial flora of, 739
Glucose-6-phosphate, dissimilation of, by *Microbacterium lacticum*, 385
Glutamic acid dehydrogenase in cell-free preparations of *Azotobacter vinelandii*, 635
Glycerol broth, preservation of bacteria by freezing in, 625

Halophilic bacteria, metabolism of, 244
— —, respiratory activity of, 244
Hemolysin of group A streptococci, 94, 100
Hexitol metabolism in *Escherichia coli*, 557
Hexose phosphates, metabolism of, by *Streptomyces coelicolor*, 308
Histidine, effect of, on growth and division of microorganisms, 140
Homocystine, utilization of stereoisomers of, by brucella, 582
Host-parasite relationship in tularemia, 270
— — in chicks infected with *Salmonella pullorum*, 521
Human skin, pink yeast from, 492
Hybridization of *Saccharomyces fragilis* and *Zygosaccharomyces dobzhanskii*, 296
— — *Saccharomyces lactis* and *Zygosaccharomyces ashbyi*, 290
— — *Zygosaccharomyces dobzhanskii* and *Saccharomyces fragilis*, 296
Hydrogen chloride method for staining nuclear material, 285
Hydrogenases, bacterial, procedure for assay of, 70
Hydrostatic pressure, effect of, on succinic dehydrogenase in *Escherichia coli*, 668

Illumination, effect of, on plaque formation by *Escherichia coli* infected with T1 bacteriophage, 231
Influenza virus infection of chick embryo, 505
— — infection of chorio-allantois, changes in amino acids during, 496
Infrared absorption spectra of bacteria, 342
Intestinal bacteria, degradation of dextrans by enzymes of, 373
Invertase, formation of, by *Myrothecium verrucaria*, 684
Iron, effect of, on phage and toxin production in *Corynebacterium diphtheriae*, 121
Isocitric dehydrogenase in *Mycobacterium tuberculosis*, 732
— —, presence of, in *Azotobacter vinelandii*, 252
Isotopes, use of membrane filters for measurement of biological incorporation of, 123

α-Ketoglutaric acid, metabolism of, by *Mycobacterium tuberculosis*, 565
— oxidase, presence of, in *Azotobacter vinelandii*, 252
Key for identification of ureolytic bacilli, 655
Kinase, nature of, in metabolism of carbohydrates by *Pseudomonas saccharophila*, 196, 202

L forms of bacteria, definition of, 208
L forms of bacteria, role of electrolytes in production and growth of, 208
Lactate-fermenting sporeforming anaerobes from silage, 43
Lactic acid, metabolism of, by *Mycobacterium tuberculosis*, 565
Lactobacillus acidophilis, assay of vitamin B_{12} by, 91
— *bifidus*, presence of, in rumen of cows, 333
— *delbrueckii*, nutrition of, 401
— *lactis*, assay of vitamin B_{12} by, 91
— *leichmannii*, assay of vitamin B_{12} by, 91
— —, filament formation by, in presence of desoxyribosides, 255
Leucine, utilization of, by *Neurospora crassa*, 108
Leuconostoc citrovorum, nutrition of, 433
— *mesenteroides*, characterization of dextrans from, 167
Leucovorin, effect of, on growth of microorganisms, 129, 140
Leukocytes, electron microscopic study of phagocytosis of *Staphylococcus aureus* by, 547
Lipoprotein in *Bacillus megaterium* and *Escherichia coli*, 689
Lymphocytic choriomeningitis virus, substances in human sera inhibitory to complement-fixing systems of, 217, 223
Lymphogranuloma venereum virus substances in human sera inhibitory to complement-fixing systems of, 217, 223
Lysis in bacteriophage-infected *Escherichia coli*, 482

Magnesium, effect of, on growth of marine bacteria, 661
Malic oxidase, presence of, in *Azotobacter vinelandii*, 252

Malleomyces pseudomallei, enhancement of virulence of, 530
Man, persistence of individual strains of *Escherichia coli* in, 370
Mannitol, metabolism of by *Escherichia coli*, 557
Mannose isomerase, presence of, in mutants of *Pseudomonas saccharophila*, 202
Marine bacteria, nutrition of, 611
Medium for isolation of *Vibrio fetus*, 251
Membrane filters, growth of *Pasteurella tularensis* on, 728
— —, resazurin staining of bacterial colonies on, 623
— —, use of, in measurement of biological incorporation of radioactive isotopes, 123
Methane fermentation, 644
Methionine, effect of, on synthesis of ribonucleic acid by *Escherichia coli*, 318
—, — of, on utilization of homocystine by brucella, 582
Method for counting viable bacteria, 381
Methylaminopterin, effect of, on growth of microorganisms, 129
9-Methylfolic acid, effect of, on growth of microorganisms, 129
Methyl group transfer in acetate fermentation, 644
5-Methyl tryptophan, effect of, on ultraviolet irradiated *Escherichia coli*, 149
Microbacterium lacticum, dissimilation of glucose by, 385
Micrococcus albus in gartersnake, 739
— *lactilyticus*, hydrogenase of, 70
— *pyogenes*, nature of binding of penicillin by, 84
— — var. *aureus*, capsular swelling of, 229
— *ureae*, dissimilation of 2,3-butanediol, acetylmethylcarbinol and diacetyl by, 425
Millipore filter, visualizing bacteria for direct counting on, 499
Mouse, enhancement of virulence of *Malleomyces pseudomallei* in, 530
M-protein of group A streptococci, biosynthesis of, 454
Mucinolytic preparations from *Vibrio comma*, antigenic relationships and toxicity of, 722
Mucopolysaccharide in *Bacillus megaterium* and *Escherichia coli*, 689
Mumps virus, substances in human sera inhibitory to complement-fixing systems of, 217, 223
Mutant-specific bactericide, production of, by action of penicillin on *Escherichia coli*, 673
Mutants from *Streptomyces venezuelae*, 328
— of *Escherichia coli*, induced formation of nitrate reductase in, 254
— — *Pseudomonas saccharophila*, metabolism of carbohydrates by, 196, 202
Mycobacterium tuberculosis, isocitric dehydrogenase in, 732
— —, oxidation of compounds related to tricarboxylic acid cycle by, 565
— — var. *bovis*, infrared absorption spectra of, 342
Mycoplana, nutrition of marine, 661
Myrothecium verrucaria, formation of invertase by, 684

Necrology of Robert Stanley Breed, 383
Neisseria, bacteriophage for chromogenic, 516
— *gonorrhoeae*, carbon dioxide requirement of, 717
— *perflava*, bacteriophage for, 516
Neurospora crassa, amino acid interrelationships in, 108
Nitrate reductase in mutants of *Escherichia coli*, induced formation of, 254
Nitro reductase from *Escherichia coli*, studies on 421
Nitrogen excretion of chicks infected with *Salmonella pullorum*, 521
— fixation in cell-free preparations of *Azotobacter vinelandii*, 635
Nuclear and cellular division in *Bacillus megaterium*, temperature synchronization of, 17
— division in bacteria, technique for study of, 474
Nucleic acid of *Escherichia coli*, unnatural pyrimidines in, 60
— — syntheses, dependence of, on amino acids in *Escherichia coli*, 677
Nutrition of *Actinomyces israeli*, 47
Nutrition of *Actinomyces naeslundi*, 47
— — *Lactobacillus delbrueckii*, 401
— — *Leuconostoc citrovorum*, 433
— — marine bacteria, 661
— — *Neurospora crassa*, 108
— — putrefactive anaerobes, 267
— — streptococci, synthesis of M-protein and, 454
— — urea-hydrolyzing bacilli, 655

Obituary of Robert Stanley Breed, 383
Ochromonas malhamensis, assay of vitamin B_{12} by, 91
Oral flora, constancy of numbers among, 703
Oxalosuccinic acid, metabolism of, by *Mycobacterium tuberculosis*, 565
Oxidase systems in *Acetobacter suboxydans*, 737
Oxidative activity in cell-free preparations of *Azotobacter vinelandii*, 635

Paracolobactrum intermedium in gartersnake, 739
Paracolon bacteria, characteristics of Arizona and Bethesda-Ballerup groups of, 339
Parasporal bodies on bacillus spores, 158
Pasteurella tularensis, D-amino acid oxidase in rats infected with, 270
— —, growth of, on membrane filters, 728

Pteroylglutamic acid, effect of, on growth of microorganisms, 129, 140
— —, *see also* Folic acid
Purine bases, effect of buffer on response of *Streptococcus faecalis* to, 503
Putrefactive anaerobes, nutrition of, 267
Pyridoxal phosphate, coenzyme activity of, for treponemal transamination, 274
Pyrimidines, halogenated, introduction of, into deoxyribonucleic acid of *Escherichia coli*, 60
—, unnatural, in deoxyribonucleic acid of *Escherichia coli*, 60
Pyruvic acid, metabolism of, by *Mycobacterium tuberculosis*, 565

Q fever rickettsia, substances in human sera inhibitory to complement-fixing systems of, 217, 223

Reactivation of ultraviolet irradiated *Escherichia coli*, 611
Reiter treponeme, transamination in, 274
Resazurin staining of bacterial colonies on membrane filters, 623
Rhodopseudomonas spheroides, effect of x-rays on survival of, 571
Rhodotorula minuta from human skin, 492
— *mucilaginosa* from human skin, 492
Ribonucleic acid, synthesis of unbalanced, by a mutant of *Escherichia coli*, 318
Ribose-5-phosphate, dissimilation of, by *Microbacterium lacticum*, 385
—, — of, by *Streptomyces coelicolor*, 308
Rickettsia mooseri, metabolism of, 708

Rickettsial complement-fixing antigen-antibody systems, substances in human sera inhibitory to, 217, 223
Rumen of cows, bacteria in, 333

S^{35} Penicillin, nature of binding of, by bacterial cells, 84
Saccharomyces cerevisiae, effect of folic acid analogues on growth of, 129
— —, effect of x-rays on survival of, 571
— *fragilis*, hybridization of, with *Zygosaccharomyces dobzhanskii*, 296
— *lactis*, hybridization of, with *Zygosaccharomyces ashbyi*, 290
Salmonella paratyphi, alteration in flagellar morphology of, by anti-flagellar serum, 54
— *pullorum*, nitrogen excretion of chicks infected with, 521
— —, probit analysis applied to survival data of, 214
Salts, effect of, on growth of marine bacteria, 661
Sarcina littoralis, respiratory activity of, 244
Sea water and marine bacterial growth, 661
Sedoheptulose diphosphate, metabolism of, by *Alcaligenes faecalis*, 649
Sedoheptulose-7-phosphate, dissimilation of, by *Microbacterium lacticum*, 385
Sera, human, substances in, inhibitory to complement-fixing systems using viruses and rickettsiae, 217, 223
Serine deaminase in *Pasteurella tularensis*, 324
—, effect of, on growth and division of microorganisms, 140
Serotypes of *Shigella boydii* in Egypt, 525
Serratia marcescens, density and size of, 315
— —, pigmentation of, 115
Sexuality of yeasts, 290, 296
Shigella boydii serotypes in Egypt, 525
Silage, lactate-fermenting sporeforming anaerobes from, 43
Size of air-borne *Serratia marcescens*, 315
Skin, pink yeast from human, 492
Snake, garter, bacterial flora of, 739
Sodium carbonate, inhibition of, on spore germination of *Bacillus subtilis*, 250
—, effect of, on growth of marine bacteria, 661
Soils, Aretic, thermophilic bacteria in, 182, 186
Sonic oscillation as an aid in counting streptococci, 624
— —, effects of, on *Streptococcus pyogenes*, 236
Sorbitol-6-phosphate, metabolism of, by *Escherichia coli*, 557
Spongothymidine, effect of, on metabolism of *Escherichia coli*, 588
Spore germination of *Bacillus subtilis*, inhibition of sodium carbonate on, 250
Spores, fungous, effect of spray-drying on viability of, 257
— of bacilli, germination of, under anaerobic conditions, 162
— — bacilli, parasporal bodies on, 158
— — *Bacillus cereus*, electron micrographs of, 348
— — *Bacillus megaterium*, electron micrographs of, 348
— —, *Myrothecium verrucaria*, formation of invertase by, 684
Sporobolomyces salmonicolor from human skin, 492
Sporulation in *Clostridium perfringens*, medium for, 495
— of *Bacillus megaterium* and *Bacillus cereus*, electron microscopy of, 348
— temperature, effect of, on resistance of *Bacillus coagulans* var. *thermoacidurans*, 10
Spray-drier apparatus for fungi, 257
Spray-drying, effect of, on viability of fungous spores, 257
Stain for nuclear material, 285
Staining of bacterial colonies on membrane filters, 623
Staphylococci, L forms of, role of electrolytes in growth of, 208
Staphylococcus aureus, phagocytosis of, electron microscopic study of, 547
Streptococci, constancy of, among oral flora, 703
—, counting of, by pour-plate method, 624
—, hemolysin and streptolysins in group A, 94, 100
—, L forms of, role of electrolytes in growth of, 208
—, synthesis of M-protein by group A, 454
Streptococcus faecalis, assimilation of folic acid by, 503
— —, effect of buffer on response of, to purine bases, 503
— —, effect of cysteine on growth of, 122
— — in garternsake, 739
— *liquefaciens* in gartersnake, 739
— *pyogenes*, effects of sonic oscillation on, 236
Streptolysin O, properties of, 94, 100
Streptolysin S′, properties of, 94, 100
Streptomyces coelicolor, metabolism of pentose and hexose phosphates by, 308
— *venezuelae*, mutants from, after exposure to X-rays, 328
Streptomycin-dependence of *Escherichia coli*, study of, 406
Succinic acid, decarboxylation of, by *Propionibacterium* pentosaceum, 598, 604
— —, decarboxylation of, by *Veillonella gazogenes*, 598, 604
— dehydrogenase from *Corynebacterium diphtheriae*, inhibition of, 439
— — in *Escherichia coli*, effect of hydrostatic pressure on, 668
— —, presence of, in *Azotobacter vinelandii*, 252

Synchronous culture of *Escherichia coli*, methods for, 542

T-form colonies of pleuropneumonialike organisms, 362
Tagatose-6-phosphate, metabolism of by *Escherichia coli*, 557
Taxonomy of yeasts, 290, 296
Thermal column exposures, bacteremia and death in mice following, 188
— death rate of *Bacillus coagulans* var. *thermoacidurans*, effect of factors on, 1, 10
— resistance of *Bacillus coagulans* var. *thermoacidurans*, effect of sporulation temperature on, 10
Thermophiles in Arctic soils and waters, 182, 186
Threonine deamination in *Escherichia coli*, 443
— dehydrase in *Escherichia coli*, 443
Thymidine analogues, effect of, on metabolism of *Escherichia coli*, 588
Thymine analogues, effect of, on metabolism of *Escherichia coli*, 588
— deficiency in *Escherichia coli*, 588
—, effect of, on inhibition of folic acid analogues for microorganisms, 140
—, — of, on ultraviolet irradiated *Escherichia coli*, 149
Toxicity and antigenic relationships of mucinolytic preparations from *Vibrio comma*, 722
Toxin production by *Corynebacterium diphtheriae*, effect of iron on, 121
Transaminase in *Pasteurella tularensis*, 324
—, — *Rickettsia mooseri*, 708
Transamination in the Reiter treponeme, 274
— of amino acids with glyoxylic acid in bacterial extracts, 81
Treponema pallidum, transamination in Reiter strain of, 274
Treponemata, transamination in, 274
Tricarboxylic acid cycle enzymes in *Azotobacter vinelandii*, 252
— — cycle, oxidation of compounds related to, by *Mycobacterium tuberculosis*, 565
Tularemia, host-parasite relationship in, 270
— in rats, effect of, on liver D-amino acid oxidase, 270

Ultraviolet irradiated *Escherichia coli*, dark reactivation in, 611
— irradiation, effect of, on chromatinic bodies of *Escherichia coli*, 462
— — in *Escherichia coli*, relation of growth to lethal damage induced by, 149
Urea-hydrolyzing bacilli, physiology of, 627, 655
—, increase in blood, in chicks infected with *Salmonella pullorum*, 521
Ureolytic bacilli, key for identification of, 655
Uridylic acid, promotion of growth of *Lactobacillus delbrueckii* by, 401

Variants, colonial, of *Pseudomonas aeruginosa*, 617
Veillonella gazogenes, decarboxylation of succinic acid by, 598, 604
Vibrio comma, antigenic relationships and toxicity of mucinolytic preparations from, 722
— *fetus*, medium for isolation of, 251
Viral complement-fixing antigen-antibody systems, substances in human sera inhibitory to, 217, 223
Virulence of *Candida albicans*, effect of cysteine on, 738
— — *Malleomyces pseudomallei*, enhancement of, 530
Virus, Eastern equine encephalomyelitis, effect of chemical agents on, 491
Vitamin B_{12}, microbiological activities of compounds related to, 91
— —, role of, in cellular division, 255
— requirements for ureolytic bacilli, 655

Waters, Arctic, thermophilic bacteria in, 182, 186
Wood-rotting basidiomycete, cellulase from, 382

X-irradiation of microorganisms, macrocolony formation after, 124
X-ray exposures, bacteremia and death in mice following, 188
X-rays, effect of on survival of bacteria and yeast, 571
—, mutants from *Streptomyces venezuelae* after exposure to, 328

Yeast, pink, from human skin, 492

Zygosaccharomyces ashbyi, hybridization of, with *Saccharomyces lactis*, 290
— *dobzhanskii*, hybridization of, with *Saccharomyces fragilis*, 296

INDEX OF DATE OF ISSUE

Month	Date of Issue	Pages
January	2/20/56	1–128
February	3/21/56	129–256
March	4/20/56	257–382
April	6/5/56	383–501
May	6/22/56	503–625
June	6/30/56	627–751

JOURNAL

OF

BACTERIOLOGY

VOLUME 72

BALTIMORE, MD.
1956

CONTENTS

No. 1, July 1956

Inactivation and Unstabilization of the Transforming Principle by Mutagenic Agents. Stephen Zamenhof, Grace Leidy, Eros Hahn, and Hattie E. Alexander 1–11

The Amino Acid Composition of the Cellular Protein of *Mycobacterium tuberculosis*. N. A. N. Rao and T. K. Wadhwani 12–15

The Anaerobic Monotrichous Butyric Acid-Producing Curved Rod-Shaped Bacteria of the Rumen. Marvin P. Bryant and Nola Small 16–21

Characteristics of Two New Genera of Anaerobic Curved Rods Isolated from the Rumen of Cattle. Marvin P. Bryant and Nola Small 22–26

Studies on *Streptococcus pyogenes*. II. Observations on the Microscopical and Biological Aspects of the Disintegration and Solubilization of a Type 6 Strain by Shaking with Glass Beads. Hutton D. Slade and Jeanette K. Vetter 27–33

Sporulation Requirements of *Bacillus coagulans* var. *thermoacidurans* in Complex Media. Mikio Amaha, Z. John Ordal, and Ali Touba 34–41

Selective Chemical Inhibition of Influenza B Virus Multiplication. Igor Tamm 42–53

High Inhibitory Activity of Certain Halogenated Ribofuranosylbenzimidazoles on Influenza B Virus Multiplication. Igor Tamm, Karl Folkers, and Clifford H. Shunk 54–58

Certain Benzimidazoles, Benzenes, and Ribofuranosylpurines as Inhibitors of Influenza B Virus Multiplication. Igor Tamm, Karl Folkers, and Clifford H. Shunk 59–64

Fermentation of C^{14}-Labeled Glucose by *Clostridium perfringens*. L. M. Paege, Martin Gibbs, and R. C. Bard 65–67

Proteolysis by *Lactobacillus casei*. I. Proteinase Activity. Erling Brandsaeter and F. E. Nelson 68–72

Proteolysis by *Lactobacillus casei*. II. Peptidase Activity. Erling Brandsaeter and F. E. Nelson 73–78

Comparative Studies of the Genus *Malleomyces* and Selected *Pseudomonas* Species. I. Morphological and Cultural Characteristics. Psyche W. Wetmore and William S. Gochenour, Jr. 79–89

Aklavin, an Antibiotic Substance with Antiphage Activity. Frieda Strelitz, Helen Flon, Ulrich Weiss, and Igor N. Asheshov 90–94

An Example of Non-Inherited Radiation Resistance. Norman N. Durham and Orville Wyss 95–100

The Acetate Requirement of *Streptococcus faecalis*. Gerald D. Shockman 101–104

The Utilization of Dihydrothymine by *Streptococcus faecalis* in the Absence of Folic Acid and Thymine. John F. Walper and R. M. Fink 105–107

The Linear Representation of Dosage-Response Curves in Microbial-Antibiotic Assays. Henry P. Treffers 108–114

Synchronization of Division of a Thymineless Mutant of *Escherichia coli*. Hazel D. Barner and Seymour S. Cohen 115–123

Notes:

Desensitization of *Escherichia coli* to Ultraviolet Light. Robert S. Weatherwax 124–125

No. 2, August 1956

Use of a Urease Test for the Screening and Identification of Cryptococci. Heinz P. R. Seeliger 127–131

Biochemical Differentiation of *Mycobacterium tuberculosis* Grown *in vivo* and *in vitro*. William Segal and Hubert Bloch 132–141

The Role of Succinate as a Precursor of Propionate in the Propionic Acid Fermentation. Harland G. Wood, Rune Stjernholm, and F. W. Leaver 142–152

The Biosynthesis of Chloramphenicol. II. Acetylation of *p*-Nitrophenylserinol. David Gottlieb, P. W. Robbins, and H. E. Carter 153–156

Further Studies on the Antibacterial Activity of Human Serum on *Micrococcus pyogenes* and Its Inhibition by Coagulase. Richard D. Ekstedt 157–161
The Characteristics of Strains of *Selenomonas* isolated from Bovine Rumen Contents. Marvin P. Bryant 162–167
The Virulence and Immunogenicity of *Salmonella typhosa* Grown in Continuous Culture. Samuel B. Formal, L. S. Baron, and Walter Spilman 168–175
Correlation of Respiratory Activity with Phases of Spore Germination and Growth in *Bacillus megaterium* as Influenced by Manganese and L-Alanine. Hillel S. Levinson and Mildred T. Hyatt 176–183
Ultraviolet Inactivation and Photoreactivation of Azotobacter. C. R. Goucher, Ichiro Kamei, and W. Kocholaty 184–188
Hydrogen Metabolism in *Acetobacter peroxydans*. Daniel E. Atkinson 189–194
The Oxidation of Ethanol and Tricarboxylic Acid Cycle Intermediates by *Acetobacter peroxydans*. Daniel E. Atkinson 195–198
Studies on the Formation of Formate, Glycine, Serine, Pyruvate and Acetate from Purines by *Clostridium acidi-urici*. Richard D. Sagers and Jay V. Beck 199–208
The Effect of Carbon Dioxide on Polysaccharide Production by *Streptococcus bovis*. Joel A. Dain, A. L. Neal, and H. W. Seeley 209–213
Utilization of Carbohydrates by Strains of *Streptomyces griseus*. D. Perlman and E. O'Brien 214–218
Heterokaryosis in Streptomyces. S. G. Bradley and Joshua Lederberg 219–225
Nitrate Reduction. I. Growth of *Escherichia coli* with Nitrate as Sole Source of Nitrogen. Earl G. McNall and Daniel E. Atkinson 226–229
Properties and Surface Location of a Sulfhydryl Oxidizing Enzyme in Fungus Spores. G. R. Mandels 230–234
Growth of *Coxiella burnetii* in Monolayer Cultures of Chick Embryo Entodermal Cells. Emilio Weiss and Helen C. Pietryk 235–241
Population Heterogeneity in the Resistance of Aerobic Spores to Ethylene Oxide. Brooks D. Church, Harlyn Halvorson, David S. Ramsey, and Roberta S. Hartman 242–247
Electron Microscopy of *Gallionella ferruginea*. A. E. Vatter and R. S. Wolfe 248–252
The Characteristics of Some Rumen Lactobacilli. R. G. Jensen, K. L. Smith, J. E. Edmondson, and C. P. Merilan 253–258
Labeling Crown Gall Bacteria with P^{32} for Radioautography. Tom Stonier 259–268
Enzymatic Aspects of Gas Formation by Salmonella. J. L. Stokes 269–275
Notes:
Dihydrouracil as a Growth Factor for a Mutant Strain of *Escherichia coli*. Irving J. Slotnick 276–277
Clarification of Serum for Storage in Liquid or Lyophile State. Elaine L. Updyke and Elizabeth Conroy 277–278
Lactose Urea Agar; A New Differential Tube Medium for the Detection of Salmonella. John McNeill Sieburth 278–279

No. 3, September 1956

Obituary—James Howard Brown. Roger D. Reid, Isabelle G. Schaub, and John H. Brewer 280–282
Growth of Group A Hemolytic Streptococcus in the Steady State. Fred Karush, Victor F. Iococca, and T. N. Harris 283–294
Monoethyl Ester of Dipicolinic Acid from Bacterial Spores. J. J. Perry and J. W. Foster 295–300
Isolation of an Aminopeptidase from Type B *Clostridium botulinum*. Robert C. Millonig 301–307
Quantitative Aspects of Transformation of Virulence in *Agrobacterium tumefaciens*. Deana T. Klein and Richard M. Klein 308–313
Some Enzymatic Activities of a Particulate Fraction from Sonic Lysates of *Escherichia coli*. Robert E. Asnis, Victor G. Vely, and Mary Catherine Glick 314–319
Studies on the Mode of Action of Novobiocin. Thomas D. Brock 320–323

Secretion of Nicotinic Acid by Biotin-Dependent Yeasts. A. H. Rose and W. J. Nickerson 324–328
Reactivation of Ultraviolet-Irradiated *Escherichia coli*. Robert S. Weatherwax 329–332
Bacterial Oxidation of *p*-Aminobenzoic Acid by *Pseudomonas fluorescens*. Norman N. Durham 333–336
Investigation of the Role of Sulfhydryl Groups in Bacteria in Relation to the Gram Stain. Tod Mittwer and J. W. Bartholomew 337–339
Influence of Phosphate Buffer on Crystal Violet Uptake and Retention by Bacterial Cells as Related to the Gram Reaction. Harold Finkelstein and J. W. Bartholomew 340–343
Studies on the Plasmodesm-like Linkage Between Spores of *Bacillus anthracis*. Norman G. Roth, Victor L. Wolfe, and Leon Marcus 344–348
Relation of Molecule Size and Structure to Alcohol Inhibition of Glucose Utilization by Yeast. William D. Gray and Carl Sova 349–356
Staining Bacterial Smears with Fluorescent Antibody. I. General Methods for *Malleomyces pseudomallei*. Max D. Moody, Morris Goldman, and Berenice M. Thomason 357–361
Staining Bacterial Smears with Fluorescent Antibody. II. Rapid detection of Varying Numbers of *Malleomyces pseudomallei* in Contaminated Materials and Infected Animals. Berenice M. Thomason, Max D. Moody, and Morris Goldman 362–367
Effect of Water on the Death Rate of *Serratia marcescens*. G. W. Monk, M. L. Elbert, C. L. Stevens, and P. A. McCaffrey 368–372
Microbiological Aspects of the Diglutamyl Derivatives of Citrovorum Factor and N^{10} Formylfolic Acid. M. Silverman and Barbara E. Wright 373–377
Characterization of *Streptomyces griseus* Bacteriophages. Renee R. Alexander and Elizabeth McCoy 378–386
Studies on 4-Aminopyrazolo (3,4-d) Pyrimidine: Growth Inhibition and Relief in *Neurospora crassa*. Robert Fuerst, Carolyn E. Somers, and T. C. Hsu 387–393
Distribution of Molybdenum^{99} in Cell-Free Preparations of *Azotobacter vinelandii*. R. F. Keeler, W. A. Bulen, and J. E. Varner 394–396
Effect of Gaseous Environment on Growth and Catalase Content of *Vibrio fetus* Cultures of Bovine Origin. E. M. Kiggins and W. N. Plastridge 397–400
Enzyme Systems in the Mycobacteria. II. The Malic Dehydrogenase. Dexter S. Goldman 401–405
Pseudomonas aureofaciens nov. spec. and Its Pigments. A. J. Kluyver 406–411
Pseudomonas aureofaciens Kluyver and Phenazine α-Carboxylic Acid, Its Characteristic Pigment. William C. Haynes, Frank H. Stodola, Joan M. Locke, Thomas G. Pridham, Howard F. Conway, Virgil E. Sohns, and Richard W. Jackson 412–417
Tricarboxylic Acid Cycle Activity in *Acetobacter pasteurianum*. Tsoo E. King, Elwell H. Kawasaki, and Vernon H. Cheldelin 418–421
Effect of X-rays on the Survival of Bacteria and Yeast. II. Relation of Cell Concentration and Endogenous Respiration to Sensitivity. Shirley E. Gunter and Henry I. Kohn 422–428

No. 4, October 1956

Microbial Utilization of Heparin. John F. Christman and David G. Doherty 429–432
The Antimicrobial Action of Heparin. John F. Christman and David G. Doherty 433–435
Biochemistry of Filamentous Fungi. IV. The Significance of the Tricarboxylic Acid Cycle in the Oxidation of Acetate by *Penicillium chrysogenum*. E. P. Goldschmidt, Irving Yall, and Henry Koffler 436–446
Quantitative Studies of Differential Staining Reactions. I. The Effect of pH on the Quantity of Dye Retained by Bacteria and the Apparent Isoelectric Point. E. R. Kennedy and A. F. Woodhour 447–450
Quantitative Studies of Differential Staining Reactions. II. The Effect of the Fixative and of Chemical Treatment of Fixed Bacteria on the Adsorption and Retention of Dye. J. F. Barbaro, E. R. Kennedy, and Rose Mary Collins 451–454

Activation of *Clostridium botulinum* Type E Toxin by Trypsin. James T. Duff, George G. Wright, and Allen Yarinsky 455–460
Cytological Analysis of Ultraviolet-Irradiated *Escherichia coli*. III. Reactions of a Sensitive Strain and Its Resistant Mutants. John I. Payne, Philip E. Hartman, Stuart Mudd, and Alexandra W. Phillips 461–472
Isolation of Systemic Mycotic Pathogens: Qualitative and Quantitative Aspects. Stanley Marcus, Betty D. Nielson, and Frances R. Rambo 473–477
The Biochemistry of the Actinomycetales. Studies on the Cell Wall of *Streptomyces fradiae*. Antonio H. Romano and Walter J. Nickerson 478–482
Studies on Pigmentation of *Serratia marcescens*. II. Characterization of the Blue and the Combined Red Pigments of Prodigiosin. James A. Green, Donald A. Rappoport, and Robert P. Williams 483–487
Restoration from an X-Ray Induced Block in Deoxyribonucleic Acid Synthesis in *Escherichia coli*. C. O. Doudney 488–493
Protection of *Escherichia coli* Against Ultraviolet Irradiation by Catalase and Related Enzymes. James E. Ogg, Howard I. Adler, and Max R. Zelle 494–496
Dissimilation of Glucose at Controlled pH Values by Pigmented and Non-Pigmented Strains of *Escherichia coli*. A. C. Blackwood, A. C. Neish, and G. A. Ledingham 497–499
A Differential and Diagnostic Plating Method for Population Studies of Respiration Deficiency in Yeast. Maurice Ogur and Ralph St. John 500–504
Lethal Effects of Gamma Radiation Upon Segments of a Natural Microbial Population. R. J. Davis, V. L. Sheldon, and S. I. Auerbach 505–510
Stimulation of Growth Initiation by Heat Degradation Products of Glucose. H. H. Ramsey and C. E. Lankford 511–518
Discovery of a New Acetate-Replacing Factor. Helen R. Skeggs, Lemuel D. Wright, Emlen L. Cresson, Gloria D. E. MacRae, Carl H. Hoffman, Donald E. Wolf, and Karl Folkers 519–524
Interactions of Oral Strains of *Candida albicans* and Lactobacilli. Genevieve Young, R. I. Krasner, and P. L. Yudkofsky 525–529
Electrophoresis of Motile Bacteria. John O. Harris and R. M. Kline 530–532
A Selective Medium for the Isolation and Enumeration of the Veillonella from the Oral Cavity. Morrison Rogosa 533–536
Studies on Pigmentation of *Serratia marcescens*. III. The Characteristics of an Orange Variant. Robert P. Williams and James A. Green 537–542
Some Characteristics of a Growth Stimulant in Corn Steep Liquor for *Lactobacillus casei*. A. H. Heimbuch, L. W. Aurand, and M. L. Speck 543–547
Culture and Physiology of a Starch-Digesting Bacterium (*Bacteroides amylophilus* n. sp.) from the Bovine Rumen. L. J. Hamlin and R. E. Hungate 548–554
Hexose Oxidation by an Enzyme System of *Malleomyces pseudomallei*. J. H. Dowling and H. B. Levine 555–560
Mode of Action of Chloramphenicol. IV. Failure of Selected Natural Metabolites to Reverse Antibiotic Action. H. E. Hopps, C. L. Wisseman, Jr., F. E. Hahn, J. E. Smadel, and R. Ho 561–567
Notes:
Complement Fixing Antibodies in Guinea Pigs Immunized with Type 3 Adenopharyngoconjunctival Virus. Georges H. Werner 568–569
Family Infection with Multiple Salmonella Types Including Two H_2S Negative Variants. I. Olitzky, H. M. Rosenthal, and J. R. Copeland 569–570
Apparent Mutagenic Effect of Thymine Deficiency for a Thymine-Requiring Strain of *Escherichia coli*. Roger Weinberg and Arthur B. Latham 570–572
A Procedure for Adsorbing Virus Neutralizing Antibodies on Paper Disks. Eugene Adams and R. P. Hanson 572

No. 5, November 1956

Nature of the Primary Action of the Autolysin of *Bacillus subtilis*. Masayasu Nomura and Junko Hosoda 573–581

Studies on a Mechanism Providing for Genetic Transfer in *Serratia marcescens*. William L. Belser and Mary I. Bunting 582–592
Bacterial Identification by Infrared Spectrophotometry. Jackson W. Riddle, Paul W. Kabler, Bernard A. Kenner, Robert H. Bordner, Sue W. Rockwood, and Heber J. R. Stevenson 593–603
Comparative Effects of Hydrocortisone, a Derived Pyridopyrimidine, and Xerosin on Pneumonia Produced in Mice by Viral and Bacterial Toxin. Vincent Groupé, Robert M. Dougherty, and Robert A. Manaker 604–609
An Enzymatic Study of the Utilization of Gluconic Acid by *Propionibacterium pentosaceum*. P. J. Vandemark and G. M. Fukui 610–614
Antigenic Analysis of D-Valine Adapted *Salmonella gallinarum*. Sheldon A. London and James C. Kakavas 615–619
Modification of Pullorum Disease in the Chick by Certain Tricarboxylic Acid Cycle Inhibitors and Intermediates. Robert F. Gilfillan, D. Frank Holtman, and Richard T. Ross 620–623
Influence of *Salmonella pullorum* Infection on Various Liver Tricarboxylic Acid Enzymes and Citrate Levels in the Chick. Robert F. Gilfillan, D. Frank Holtman, and Richard T. Ross 624–627
Synthesis of Purine Intermediates by a Cell-Free Extract of *Escherichia coli*. Samuel H. Love 628–631
A Cytological Study of *Coccidioides immitis* by Electron Microscopy. E. M. O'Hern and B. S. Henry 632–645
Studies on *Pseudomonas methanica* (Söhngen) nov. comb. Martin Dworkin and J. W. Foster 646–659
Antibiotic and Cytostatic Properties of the Actinomycins. Leonora H. Pugh, Edward Katz, and Selman A. Waksman 660–665
Survival Time as a Rapid Method of Determining Virulence with *Bacillus anthracis*. Norman G. Roth, Ira A. DeArmon, Jr., and David H. Lively 666–672
Studies on the Nutrition of *Bacterium salmonicida*. William M. O'Leary, Charles Panos, and George E. Helz 673–676
A Selective Medium for Oral Fusobacteria. Robert R. Omata and Murray N. Disraely 677–680
Properties of a Fatty Acid Forming Organism Isolated from the Rumen of Sheep. S. R. Elsden, B. E. Volcani, F. M. C. Gilchrist, and D. Lewis 681–689
Inhibition of Oral Lactobacilli by Streptococci. Gordon E. Green and Matthew C. Dodd 690–693
Carbohydrate Metabolism of *Penicillium chrysogenum*. Charles J. Sih and S. G. Knight 694–699
Ferrobacillus ferrooxidans: A Chemosynthetic Autotrophic Bacterium. William W. Leathen, Norma A. Kinsel, and S. A. Braley, Sr. 700–704
Symbiotic Biosynthesis of Folic Acid-Like Growth Factors. Bernard W. Koft and John H. Morrison 705–707
Oxidative Dissimilation of Amino Acids and Related Compounds by *Shigella flexneri*. Arvid L. Erlandson, Jr., and Robert F. Ruhl 708–712
The Pathogenicity of *Klebsiella pneumoniae* for Mice: The Relationship to the Quantity and Rate of Production of Type-Specific Capsular Polysaccharide. Lionel Ehrenworth and Harold Baer 713–717
Notes:
Aerobic Cultivation of *Clostridium tetani*. M. Lev 718–719
A Procedure for Counting Leptospirae Based upon the Congo Red Negative Stain. Bill H. Hoyer 719–720
An *in vitro* Method for Determination of Antibiotic Sensitivity of Avian Pleuropneumonia-Like Organisms. Z. Zolli, Jr., M. J. Gallian, G. S. Shea, and K. E. Price 720
Gram Reaction of Isolated Protoplasts and Surface Membranes of *Bacillus megaterium*. Philipp Gerhardt, John W. Vennes, and Eugene M. Britt 721
Evidence of Serological Heterogeneity of T2 Bacteriophage. Yoh Tanami and Yoshihiro Miyajima 721–723

Effects of Dietary Antibiotics upon Numbers and Kinds of Intestinal Bacteria in Chicks. R. F. Wiseman, W. B. Sarles, D. A. Benton, A. E. Harper, and C. A. Elvehjem 723–724

No. 6, December 1956

Obituary—Charles Thom. Kenneth B. Raper 725–727
Typing of *Mima polymorpha* by a Precipitin Technique. Sylvia G. Cary, Robert B. Lindberg, and John H. Faber, Jr. 728–729
Biosynthesis of Methionine from Homocysteine and s-Methylmethionine in Bacteria. Stanley K. Shapiro 730–735
Electron Microscopic Study of Phagocytosis of Staphylococcus by Human Leukocytes. II. Virulent and Non-Virulent Staphylococci. J. R. Goodman, R. E. Moore, and R. F. Baker 736–745
A Cyclic Pathway for the Bacterial Dissimilation of 2,3-Butanediol, Acetylmethylcarbinol and Diacetyl. II. The Synthesis of Diacetylmethylcarbinol from Diacetyl, A New Disphosphothiamin Catalyzed Reaction. Elliot Juni and Gloria A. Heym 746–753
Succinic Dehydrogenase in the Particulate Fraction of *Mycobacterium avium*. Masamichi Kusunose, Sadamu Nagai, Emi Kusunose, and Yuichi Yamamura 754–761
Studies of a "Particulate" Formic Dehydrogenase from *Escherichia coli*. Meyer J. Wolin and Herman C. Lichstein 762–766
Electron-Scattering Granules and Reducing Sites in Mycobacteria. Stuart Mudd, Kenji Takeya, and Howard J. Henderson 767–783
Effect of Physico-Chemical Environment on Spherulation of *Coccidioides immitis* in a Chemically Defined Medium. John Lay Converse 784–792
Rapid Method for Testing Raffinose Fermentation by Yeasts. N. Van Uden 793–795
Gene Control of Resistance vs. Sensitivity to Cadmium in Saccharomyces. James E. Middlekauff, Seiichi Hino, Sing Ping Yang, Gertrude Lindegren, and Carl C. Lindegren 796–801
Nutritional Studies of a Virulent Strain of *Haemophilus ducreyi*. Gloria W. Ajello, Wilbur E. Deacon, Lillian Paul, and Kenneth W. Walls 802–808
A Maltose-Fermenting Variant of *Clostridium hemolyticum*. Louis DS. Smith, Kenneth D. Claus, and Tats Matsuoka 809–812
Auxotrophic Mutants of Mycobacteria Dependent on Fatty Acids Derived from the Parent Strain. J. L. Karlsson 813–815
Serological Studies on *Leuconostoc mesenteroides*. Ruth Sierra and C. S. McCleskey 816–820
Biochemical Aspects of the Cell Growth of *Escherichia coli* as Studied by the Method of Synchronous Culture. Yoichi Maruyama 821–826
On the Mechanism of Sonic Lysis of Bacteria. Boris Rotman 827–830
Penicillinase of *Escherichia coli* and its Relation to a Penicillin-Binding Component. Samuel Liberman and Marvin J. Johnson 831–833
Studies on Bacterial Utilization of Uronic Acids. I. *Serratia marcescens*. William J. Payne 834–838
Antagonism of the Inhibitory Action of Aminosalicylic Acid on *Mycobacterium tuberculosis* by Methionine, Biotin and Certain Fatty Acids, Amino Acids, and Purines. Loyd W. Hedgecock 839–846
Electron Microscopy and Serology of Staphylococcus Phages. J. T. Seto, Paul Kaesberg, and J. B. Wilson 847–850
Electron Microscopic Study of the Extracellular Materials of *Pasteurella pestis*. T. T. Crocker, T. H. Chen, and K. F. Meyer 851–857
Purine Metabolism in Bacteria. IV. L-Azaserine as an Inhibitor. Joseph S. Gots and Edith G. Gollub 858–864
Biochemistry of the Actinomycetales. II. A Comparison of the Cell Wall Composition of Species of the Genera *Streptomyces* and *Nocardia*. Antonio H. Romano and Arthur Sohler 865–868
Notes:
Adaptation of the Membrane Filter Technique to the Recovery of *Vibrio comma* from Water Samples. Oscar Felsenfeld and William Kozo Rokkaku 869–870
Erratum 871

INDEX OF DATE OF ISSUE—VOLUME 72

Month	Date of Issue	Pages
July	8/3/56	1–126
August	9/7/56	127–279
September	10/1/56	280–428
October	11/1/56	429–572
November	12/14/56	573–724
December	2/8/57	725–882

INDEX OF SUBJECTS[1]

Acetate, oxidation of by *Penicillium chrysogenum*, 436
—-replacing factor, discovery of a new, 519
—requirement of *Streptococcus faecalis*, 101
Acetobacter pasteurianum, tricarboxylic acid cycle activity in, 418
—*perozydans*, hydrogen metabolism in, 189
—*perozydans*, oxidation of ethanol and tricarboxylic acid cycle intermediates by, 195
Acetylation of p-nitrophenylserinol by *Streptomyces venezuelae*, 153
Acetylmethylcarbinol, dissimilation of, by *Micrococcus ureae*, 746
Achromobacter liquefaciens, infrared spectra of, 593
Actinomycetales, cell wall preparation of, 865
Actinomycins, properties of, 660
Adenopharyngoconjunctival virus, complement fixing antibodies for, 568
Adsorbing virus neutralizing antibodies on paper disks, procedure for, 572
Aerobacter aerogenes, electrophoresis of, 530
— —, infrared spectra of, 593
— —, synthesis of methionine by, 730
— —, utilization of heparin by, 429
— *cloacae*, utilization of heparin by, 429
Agrobacterium tumefaciens, labeling of, with P^{32}, for radioautography, 259
— —, transformation of virulence in, 308
Aklavin, antibiotic for bacteriophages, characteristics of, 90
L-Alanine, effect of, on respiration and spore germination of *Bacillus megaterium*, 176
Alcaligenes bookeri, electrophoresis of, 530
— *faecalis*, infrared spectra of, 593
Alcohols, inhibition of glucose utilization by yeast by, 349
Aldolase in *Propionibacterium pentosaceum*, 610
Amino acid composition of *Mycobacterium tuberculosis*, 12
— acids, antagonism of inhibitory action of aminosalicylic acid for *Mycobacterium tuberculosis* by, 839
— —, dissimilation of, by *Shigella flexneri*, 708
p-Aminobenzoic acid, biosynthesis of, 705
— —, oxidation of, by *Pseudomonas fluorescens*, 333
5-Amino-4-imidazolecarboxamide ribotide, synthesis of, by extract of *Escherichia coli*, 624
Aminopeptidase from type B *Clostridium botulinum*, 301
4-Aminopyrazolo (3,4-d)pyrimidine, growth inhibition of *Neurospora crassa* by, 387
Aminosalicylic acid, antagonism of inhibitory action of, on *Mycobacterium tuberculosis*, 839
Antibiotic activity of phenazine α-carboxylic acid, 406, 412
— —, photometric growth assays of, 108
—, chloramphenicol, mode of action of, 561
— sensitivity of pleuropneumonia-like organisms, 720
— substance for bacteriophages, aklavin, 90
Antibiotics, effect of dietary, on intestinal bacteria in chicks, 723
Antibodies, procedure for adsorbing virus, on paper disks, 572
Antibody, fluorescent, use of, in staining *Malleomyces* species, 357, 362
Antigenic analysis of valine adapted *Salmonella gallinarum*, 615
Autolysin of *Bacillus subtilis*, action of, 573
L-Azaserine, inhibitor of bacterial metabolism of purines, 858
— resistant mutant of *Escherichia coli*, 858
Azotobacter agile, effect of X-rays on, 422
— species, ultraviolet inactivation and photoreactivation of, 184
— *vinelandii*, molybdenum[99] in cell-free preparations of, 394
— —, sonic lysis of, 827

Bacillus anthracis, infrared spectra of, 593
— —, plasmodium-like linkage between spores of, 344
— —, virulence of, method of testing, 666
— *cereus*, electrophoresis of, 530
— —, plasmodium-like linkage between spores of, 344
— — var. *mycoides*, monoethyl ester of dipicolinic acid from spores of, 295
— *coagulans* var. *thermoacidurans*, sporulation of, 34
— *megaterium*, effect of manganese and L-alanine on respiration and spore germination of, 176
— —, electrophoresis of, 530
— —, gram reaction of protoplasts and membranes of, 721
— *mycoides*, plasmodium-like linkage between spores of, 344
— *polymyxa*, electrophoresis of, 530
— species spores, resistance of, to ethylene oxide, 242
— *subtilis*, action of autolysin from, 573
— —, electrophoresis of, 530
Bacteriophages, serological heterogeneity of T2, 721

[1] All entries indexed to first page of article.

Bacteriophages, characteristics of antibiotic (aklavin) for, 90
— for *Streptomyces griseus*, characteristics of, 378
Bacterium salmonicida, nutrition of, 673
Bacteroides amylophilus nov. spec., characteristics of, 548
Benzene derivatives, inhibition of influenza B virus by, 59
Benzimidazole derivatives, inhibition of influenza B virus by, 42, 54, 59
Biochemical differentiation of *Mycobacterium tuberculosis*, 132
Biochemistry of the Actinomycetales, 865
Biosynthesis of chloramphenicol by *Streptomyces venezuelae*, 153
— of methionine from homocysteine and s-methylmethionine, 730
Biotin, antagonism of inhibitory action of aminosalicylic acid for *Mycobacterium tuberculosis* by, 839
—-dependent yeasts, secretion of nicotinic acid by, 324
Blastomyces dermatitidis, isolation of, 473
Botulinum toxin, type E, activation of, by trypsin, 455
— —, type E, toxicity of, 455
Bovine rumen, *Butyrivibrio fibriosolvens* nov. spec. in, 16
— —, characteristics of *Bacteroides amylophilus* n. sp. from, 548
— — contents, characteristics of *Selenomonas ruminantium* from, 162
— —, *Lachnospira multiparus* nov. spec. in, 22
— —, *Succinivibrio dextrinosolvens* nov. spec. in, 22
Brown, James Howard (1884–1956), necrology of, 281
Brucella abortus, infrared spectra of, 593
2,3-Butanediol, dissimilation of, by *Micrococcus ureae*, 746
Butyric acid-producing bacteria in bovine rumen, 16
Butyrivibrio fibrisolvens nov. spec., characteristics of, 16
— — nov. spec., in bovine rumen, 16
— nov. gen., characteristics of, 16

Cadmium, gene control of resistance *vs.* sensitivity in yeast to, 796
Candida albicans, interactions of oral lactobacilli with, 525
— *humicola*, urease test for, 127
c-Carbohydrate in *Streptococcus pyogenes*, 27
Carbohydrate metabolism of *Penicillium chrysogenum*, 694
Carbohydrates, utilization of, by *Streptomyces griseus*, 214
Catalase content of *Vibrio fetus*, effect of gaseous environment on, 397
—, presence of, and increased resistance of *Escherichia coli* to ultraviolet, 494
Cellulomonas rossica, electrophoresis of, 530
Cell wall, action of autolysin from *Bacillus subtilis* on, 573
— — of *Streptomyces fradiae*, studies on, 478
— — preparations of the Actinomycetales, 865
Chick embryo entodermal cells, growth of *Coxiella burnetii* in, 235
Chicks, effect of dietary antibiotics on intestinal bacteria in, 723
Chloramphenicol, mode of action of, 561
Citrate level in chick livers during *Salmonella pullorum* infection, 624
Citrovorum factor, di-glutamyl derivatives of, microbiological aspects of, 373
Clostridium acidi-urici, purine metabolism of, 199
— *botulinum*, aminopeptidase from type B, 301
— —, proteinase from type B, 301
— — type E toxin, activation of, by trypsin, 455
— *hemolyticum*, maltose-fermenting variant of, 809
— *perfringens*, fermentation of C^{14}-labeled glucose by, 65
— *tetani*, aerobic cultivation of, 718
Coagulase, inhibition of antibacterial activity of human serum on *Micrococcus pyogenes* by, 157
Cobalt, role of, in aerobic cultivation of *Clostridium tetani*, 718
Coccidioides immitis, cytology of, 632
— —, effect of environment on spherulation of, 784
— —, electron micrographs of, 632
CO_2, effect of, on polysaccharide production by *Streptococcus bovis*, 209
Complement fixing antibodies for adenopharyngoconjunctival virus, 568
Continuous culture of *Salmonella typhosa*, effect of, on virulence and immunogenicity, 168
Corn steep liquor, characteristics of growth stimulant in, for *Lactobacillus casei*, 543
Corynebacterium diphtheriae, infrared spectra of, 593
Coxiella burnetii, growth of, in monolayer cultures of chick embryo cells, 235
Crown gall bacteria labeled with P^{32} for radioautography, 259
— bacterium, transformation of virulence in, 308
Cryptococci, urease test for identification of, 127
Cryptococcus neoformans and related species, urease test for, 127
— —, isolation of, 473
Crystal violet, influence of phosphate buffer on uptake of, 340
— —, retention of, by bacteria, 447, 451
Cysteamine, restoration of X-ray induced block in *Escherichia coli* by, 488

Cytological analysis of ultraviolet-irradiated *Escherichia coli*, 461

Death rate of *Serratia marcesens*, effect of water on, 368
Deoxyribonucleic acid synthesis in *Escherichia coli*, restoration from X-ray induced block in, 488
— —, transformation of virulence in *Agrobacterium tumefaciens* by, 308
Desensitization of *Escherichia coli* to ultraviolet light, 124
Diacetyl, dissimilation of, by *Micrococcus ureae*, 746
Diacetylmethylcarbinol, synthesis of, from diacetyl, by *Micrococcus ureae*, 746
Di-glutamyl derivatives of citrovorum factor, microbiological aspects of, 373
Dihydrothymine, utilization of, by *Streptococcus faecalis*, 105
Dihydrouracil, growth factor for mutant of *Escherichia coli*, 276
Diphosphothiamin, role of, in synthesis of diacetylmethylcarbinol from diacetyl, 746
Dipicolinic acid from bacterial spores, monoethyl ester of, 295
Dissimilation of glucose at controlled pH values by *Escherichia coli*, 497
Dosage-response curves in microbial-antibiotic assays, 108
Dye retention by bacteria, effect of factors on, 447, 451

Electron micrographs of *Bacillus subtilis*, 573
— — of *Coccidioides immitis*, 632
— — of *Malleomyces mallei*, 79
— — of *Malleomyces pseudomallei*, 79
— — of *Pseudomonas methanica*, 646
— — of *Pseudomonas ovalis*, 79
— — of *Pseudomonas stutzeri*, 79
— — of staphylococcus phages, 847
— microscopic study of phagocytosis of staphylococci, 736
— microscopy of extracellular materials of *Pasteurella pestis*, 851
— — of *Gallionella furruginea*, 248
— — of staphylococcus phages, 847
—-scattering granules in mycobacteria, 767
Electrophoresis of motile bacteria, 530
Endotoxin of *Escherichia coli*, suppression of effect of on mice by drugs, 604
Enzymatic activities of lysates of *Escherichia coli*, 314
— aspects of gas formation by Salmonella, 269
Enzyme systems in the mycobacteria, 401
Erwinia carotovora, electrophoresis of, 530
Escherichia coli, biochemical aspects of synchronous culture of, 821
— —, cytological analysis of ultraviolet-irradiated, 461
— —, deoxyribonucleic acid synthesis in, restoration from X-ray induced block in, 488
— —, desensitization of, to ultraviolet light, 124
— —, dissimilation of glucose by, at controlled pH values, 497
— —, effect of pH on dye retention by, 447, 451
— —, effect of X-rays on, 422
— —, electrophoresis of, 530
— —, enzymatic activities of sonic lysates of, 314
— —, increase in resistance of, to ultraviolet, by presence of catalase, 494
— —, infrared spectra of, 593
— —, nitrate reduction by, 226
— —, nitrite reduction by, 226
— —, non-inherited radiation resistance in, 95
— —, particulate, formic dehydrogenase in, 762
— —, penicillinase of, 831
— —, purine metabolism of, inhibition by L-azaserine, 858
— —, reactivation of ultraviolet-irradiated, 329
— —, sonic lysis of, 827
— —, studies on thymine-requiring strain of, 570
— —, synchronization of division of a thymineless mutant of, 115
— —, synthesis of methionine by, 730
— —, synthesis of purine intermediates by extract of, 624
— —, utilization of heparin by, 429
Ethanol, oxidation of, by *Acetobacter perozydans*, 195
Ethylene oxide, resistance of spores to, 242

Family infection with multiple Salmonella types, 569
Fatty acids, antagonism of inhibitory action of aminosalicylic acid for *Mycobacterium tuberculosis* by, 839
— —, mutants of mycobacteria dependent on, 813
Fermentation of C^{14}-labeled glucose by *Clostridium perfringens*, 65
Ferrobacillus ferrooxidans, characteristics of, 700
Fluorescent antibody, staining of *Malleomyces* species with, 357, 362
Fluoroacetate, effect of, on pullorum disease, 620, 624
Folic acid, biosynthesis of, 705
Formic dehydrogenase in *Acetobacter perozydans*, 189
— —, particulate, in *Escherichia coli*, 762
N^{10} Formyl-folic acid, microbiological aspects of, 373
Fungus spores, sulfhydryl oxidizing enzyme in, 230
Fusobacteria, medium for, 677
Fusobacterium nucleatum, medium for, 677

— *plauti-vincenti*, medium for, 677
— *polymorphum*, medium for, 677

Gallionella ferruginea, electron microscopy of, 248
Gamma radiation, lethal effects of, on a natural microbial population, 505
Gaseous environment, effect of, on growth and catalase content of *Vibrio fetus*, 397
Gene control of resistance vs. sensitivity to cadmium in Saccharomyces, 796
Genetic transfer in *Serratia marcescens*, mechanism of, 582
Glass beads, disintegration of *Streptococcus pyogenes* by shaking with, 27
Glucokinase in *Propionibacterium pentosaceum*, 610
Gluconic acid, utilization of, by *Propionibacterium pentosaceum*, 610
Glucose, dissimilation of, at controlled pH values, by *Escherichia coli*, 497
—, fermentation of C^{14}-labeled, by *Clostridium perfringens*, 65
—, heat degradation products of, stimulation of growth of *Lactobacillus fermenti* by, 511
— utilization by yeast, inhibition of by alcohols, 349
Gram reaction, studies on, 337, 340
— stain, relation of sulfhydryl groups in bacteria to, 337
Granules, electron-scattering, in mycobacteria, 767
Growth factor for mutant of *Escherichia coli*, 276
Guanine, metabolism of, by *Clostridium acidiurici*, 199
Guinea pigs, toxicity of botulinum toxin type E for, 455

Haemophilus ducreyi, nutrition of, 802
— *influenzae*, transforming principle of, 1
Heat degradation products of glucose, stimulation of growth of *Lactobacillus fermenti*, by, 511
—, inactivation of transforming principle of *Haemophilus influenzae* by, 1
Heparin, antimicrobial action of, 433
—, microbial utilization of, 429
Heterokaryosis in Streptomyces, 219
Hexacosanoic acid, growth of a mutant of mycobacteria on, 813
Hexose oxidation by enzyme system of *Malleomyces pseudomallei*, 555
Histoplasma capsulatum, isolation of, 473
Homocysteine, biosynthesis of methionine from, 730
Hydrocortisone, suppression of pneumonia by, 604
Hydrogenase in *Acetobacter perozydans*, 189
Hydrogen metabolism in *Acetobacter perozydans*, 189

Immunogenicity of *Salmonella typhosa* grown in continuous culture, 168
Influenza B virus, inhibition of, by benzimidazole derivatives, 42, 54, 59
— — — multiplication, inhibition of, 42, 54, 59
— virus, suppression of effect of on mice by drugs, 604
Infrared spectrophotometry, bacterial identification by, 593
Intestinal bacteria in chicks, effect of dietary antibiotics on, 723

Klebsiella pneumoniae, pathogenicity of, 713

Lachnospira multiparus nov. spec., characteristics of, 22
— nov. gen., characteristics of, 22
Lactobacilli, characteristics of rumen, 253
—, oral, inhibition of, by streptococci, 690
—, —, interactions of *Candida albicans* with, 525
Lactobacillus acidophilus, a new factor for, 519
— —, characteristics of, 253
— *bifidus*, a new factor for, 519
— *brevis*, characteristics of, 253
— *buchneri*, characteristics of, 253
— *bulgaricus*, a new factor for, 519
— *casei*, characteristics of, 253
— —, characteristics of growth stimulant in corn steep liquor for, 543
— —, effect of citrovorum factor and folic acid preparations on, 373
— —, peptidases of, characteristics of, 73
— —, proteinases of, characteristics of, 68
— —, proteolysis by, 68, 73
— *fermenti*, characteristics of, 253
— —, stimulation of growth of, by heat degradation products of glucose, 511
— *plantarum*, characteristics of, 253
Lactose-urea agar, a new differential medium for Salmonella, 278
Leptospirae, counting of, 719
Lethal effects of gamma radiation on a natural microbial population, 505
Leukocytes, phagocytosis of *Staphylococcus aureus* by human, electron microscopic study of, 736
Leuconostoc citrovorum, effect of citrovorum factor and folic acid preparations on, 373
— *dextranicum*, infrared spectra of, 593
— *mesenteroides*, serology of, 816
Lipoic acid plus thiamin, substitute for acetate in metabolism of *Streptococcus faecalis*, 101
Lysozyme, effect of, on cell wall of *Streptomyces fradiae*, 478

Magnesium sulfate, reversal of action of novobiocin by, 320
Malic dehydrogenase in *Mycobacterium tuberculosis*, 401

Malleomyces mallei, characteristics of, 79
— —, staining with fluorescent antibody, 357, 362
— *pseudomallei*, characteristics of, 79
— —, hexose oxidation by enzyme system of, 555
— —, staining with fluorescent antibody, 357, 362
Maltose-fermenting variant of *Clostridium hemolyticum*, 809
Manganese, effect of, on respiration and spore germination of *Bacillus megaterium*, 176
Medium for oral fusobacteria, 677
— — the *Veillonella* species, 533
Membrane filter technique, adaptation of, to recovery of *Vibrio comma* from water, 869
Methanomonas methanica, see *Pseudomonas methanica*, 646
Methionine, antagonism of inhibitory action of amino-salicylic acid for *Mycobacterium tuberculosis* by, 839
—, biosynthesis of, from homocysteine and s-methylmethionine, 730
s-Methylmethionine, biosynthesis of methionine from, 730
Mice, toxicity of botulinum toxin type E for, 455
Microbial-antibiotic assays, dosage-response curves in, 108
Micrococcus pyogenes, antibacterial activity of human serum on, 157
— — var. *aureus*, effect of pH on dye retention by, 447, 451
— — var. *aureus*, infrared spectra of, 593
— *ureae*, dissimilation of 2,3-butanediol, acetylmethylcarbinol and diacetyl by, 746
Mima polymorpha, isolation of, from water, 870
— —, typing of, 728
Mode of action of chloramphenicol, 561
— — — of novobiocin, 320
Molybdenum^{99} in cell-free preparations of *Azotobacter vinelandii*, 394
Monoethyl ester of dipicolinic acid from bacterial spores, 295
Morphology of genera *Malleomyces* and *Pseudomonas*, comparison of, 79
Motile bacteria, electrophoresis of, 530
Mucopolysaccharide in cell wall of *Streptomyces fradiae*, 478
Multiplication of influenza B virus, inhibition of, 42, 54, 59
Mutagenic agents, inactivation of transforming principle of *Haemophilus influenzae* by, 1
Mutant of *Escherichia coli*, dihydrouracil as a growth factor for, 276
— — *Serratia marcescens*, characterization of orange, 537
Mutants of mycobacteria dependent on fatty acids, 813
Mycobacteria, mutants of, dependent on fatty acids, 813
—, response of mutants of, to tuberculostearic acid and hexacosanoic acid, 813
Mycobacterium avium, succinic dehydrogenase in, 754
— *thamnopheos*, electron-scattering granules in, 767
— *tuberculosis*, amino acid composition of, 12
— —, antagonism of inhibitory action of amino-salicylic acid on, 839
— —, biochemical differences of, when grown *in vivo* and *in vitro*, 132
— —, malic dehydrogenase in, 401
— —, proteins of, amino acid composition of, 12
— — var. *bovis*, electron-scattering granules in, 767
Mycotic pathogens, isolation of systemic, 473
Myrothecium verrucaria, sulfhydryl oxidizing enzyme in spores of, 230

Necrology of Charles Thom (1872–1956), 725
— — James Howard Brown (1884–1956), 281
Neisseria catarrhalis, infrared spectra of, 593
Neurospora crassa, inhibition of growth of, by 4-aminopyrazolo (3,4-d)pyrimidine, 387
Newcastle disease virus, suppression of effect of on mice by drugs, 604
New species, *Bacteroides amylophilus*, characteristics of, 548
Nicotinic acid, secretion of, by biotin-dependent yeasts, 324
Nitrate reduction by *Escherichia coli*, 226
Nitrite reduction by *Escherichia coli*, 226
Nitrogen metabolism of *Escherichia coli* in synchronous culture, 821
— mustards, inactivation of transforming principle of *Haemophilus influenzae* by, 1
p-Nitrophenylserinol, acetylation of, by *Streptomyces venezuelae*, 153
Nocardia asteroides, cell wall preparations of, 865
— *polychromogenes*, cell wall preparations of, 865
— *rubra*, cell wall preparations of, 865
Novobiocin, mode of action of, 320
Nucleic acid synthesis of *Escherichia coli* in synchronous culture, 821
Nutrition of *Bacterium salmonicida*, 673
— — *Haemophilus ducreyi*, 802
— — lactobacilli, a new acetate-replacing factor in, 519
— — *Lactobacillus casei*, 543
— — *Streptococcus faecalis*, 105

Obituary of James Howard Brown (1884–1956), 281
Oral strains of *Candida albicans* and lactobacilli, interactions of, 525

pH, effect of, on dye retention by bacteria, 447, 451

M-Protein in *Streptococcus pyogenes*, 27
Paracolobactrum aerogenoides, utilization of heparin by, 429
— *coliforme*, utilization of heparin, by, 429
Particulate fraction from lysates of *Escherichia coli*, enzymatic activity of, 314
Pasteurella pestis, electron microscopy of extracellular materials of, 851
Pathogenicity of *Klebsiella pneumoniae*, 713
Penicillinase of *Escherichia coli*, 831
Penicillium chrysogenum, carbohydrate metabolism by, 694
— —, oxidation of acetate by, 436
Peptidases of *Lactobacillus casei*, characteristics of, 73
Peptides, metabolism of, by *Lactobacillus casei*, 73
Phages, characteristics of antibiotic (aklavin) for, 90
— for *Streptomyces griseus*, characteristics of, 378
—, staphylococcus, electron microscopy and serology of, 847
Phagocytosis of *Staphylococcus aureus*, electron microscopic study of, 736
Phenazine α-carboxylic acid, a new pigment from *Pseudomonas aureofaciens* nov. spec., 406, 412
Phosphate buffer, influence of, on uptake of crystal violet by bacteria, 340
Phosphofructokinase in *Propionibacterium pentosaceum*, 610
Phosphohexose isomerase in *Propionibacterium pentosaceum*, 610
Pichia kluyveri, secretion of nicotinic acid by, 324
Pigmentation of *Serratia marcescens*, studies on, 483, 537
Pigments of *Pseudomonas aureofaciens* nov. spec., 406, 412
Plasmodesmoid, a new term for linkage between spores, 344
Plasmodium-like linkage between spores of *Bacillus anthracis* and other bacilli, 344
Plating method for population studies of respiration deficiency in yeast, 500
Pleuropneumonia-like organisms, antibiotic sensitivity of, 720
Polysaccharide production by *Streptococcus bovis*, 209
Population studies of respiration deficiency in yeast, plating method for, 500
Prodigiosin, characterization of, 483, 537
Propionibacterium arabinosum, role of succinate as precursor of propionate in, 142
— *pentosaceum*, utilization of gluconic acid by, 610
Propionic acid fermentation, role of succinate as precursor of propionate in, 142
Proteinase from type B *Clostridium botulinum*, 301
Proteinases of *Lactobacillus casei*, characteristics of, 68
Proteins of *Mycobacterium tuberculosis*, amino acid composition of, 12
Proteolysis by *Lactobacillus casei*, 68, 73
Proteus mirabilis, electrophoresis of, 530
— *vulgaris*, utilization of heparin by, 429
Protoplasts of *Bacillus megaterium*, gram reaction of, 721
Pseudomonas aeruginosa, characteristics of, 79
— —, electrophoresis of, 530
— —, infrared spectra of, 593
— *aureofaciens* nov. spec. and its pigments, characteristics of, 406, 412
— *chlororaphis*, electrophoresis of, 530
— *fluorescens*, characteristics of, 79
— —, effect of X-rays on, 422
— —, electrophoresis of, 530
— —, oxidation of *p*-aminobenzoic acid by, 333
— *fragi*, electrophoresis of, 530
— *graveolens*, electrophoresis of, 530
— *indolozidans*, electrophoresis of, 530
— *methanica*, studies on, 646
— *ovalis*, characteristics of, 79
— *stutzeri*, characteristics of, 79
Pullorum disease, modification of, 620, 624
Purine intermediates, synthesis of, by extract of *Escherichia coli*, 624
— metabolism in bacteria, 858
Purines, antagonism of inhibitory action of aminosalicyclic acid for *Mycobacterium tuberculosis* by, 839
—, metabolism of, by *Clostridium acidi-urici*, 199

Radiation resistance, non-inherited, 95
Radioautography of crown gall bacteria labeled with P^{32}, 259
Raffinose fermentation by yeasts, method for testing, 793
Reactivation of ultraviolet-irradiated *Escherichia coli*, 329
Recombination in *Serratia marcescens*, 582
Resistance of aerobic spores to ethylene oxide, 242
— to cadmium in Saccharomyces, gene control of, 796
Respiration deficiency in yeast, plating method for population studies of, 500
Rhodopseudomonas spheroides, effect of X-rays on, 422
Rhodospirillum rubrum, electrophoresis of, 530
Rhodotorula rubra and related species, urease test for, 127
Ribofuranosylbenzimidazole derivatives, inhibition of influenza B virus by, 54, 59
Rumen, *Butyrivibrio fibriosolvens* in bovine, 16
— contents, bovine, characteristics of *Selenomonas ruminantium* from, 162
— flora of sheep, properties of, 681
—, *Lachnospira multiparus* nov. spec. in bovine, 22

— lactobacilli, characteristics of, 253
—, *Succinivibrio dextrinosolvens* nov. spec. in, 22

Saccharomyces cerevisiae, effect of X-rays on, 422
— —, glucose utilization by, inhibition by alcohols, 349
— —, secretion of nicotinic acid by, 324
Salmonella cholerasius, electrophoresis of, 530
— *gallinarum*, antigenic analysis of valine adapted, 615
— *pullorum* infection, modification of, 620, 624
— species, enzymatic aspects of gas formation by, 269
— —, lactose urea agar for differentiation of, 278
— types, family infection with multiple, 569
— *typhimurium*, electrophoresis of, 530
— —, infrared spectra of, 593
— *typhosa*, virulence and immunogenicity of, grown in continuous culture, 168
Selenomonas ruminantium, characteristics of, 162
Sensitivity to cadmium in Saccharomyces, gene control of, 796
Serological heterogeneity of T2 bacteriophage, 721
— types of *Mima polymorpha*, 728
Serology of *Leuconostoc mesenteroides*, 816
— — staphylococcus phages, 847
Serratia marcescens, characterization of orange mutant of, 537
— —, effect of water on death rate of, 368
— —, mechanism of genetic transfer in, 582
— —, pigments of, 483, 537
— —, utilization of uronic acids by, 834
Serum, clarification of, 277
—, human, antibacterial activity of, on *Micrococcus pyogenes*, 157
Sheep, properties of rumen flora of, 681
Shigella dysenteriae, infrared spectra of, 593
— *flexneri*, dissimilation of amino acids by, 708
Sonic lysates of *Escherichia coli*, enzymatic activities of, 314
— lysis of bacteria, mechanism of, 827
Spherulation of *Coccidioides immitis*, effect of environment on, 784
Spirillum serpens, electrophoresis of, 530
Spore germination of *Bacillus megaterium*, effect of manganese and L-alanine on, 176
Spores, bacterial, monoethyl ester of dipicolinic acid from, 295
— of *Bacillus anthracis*, plasmodium-like linkage between, 344
— — *Myrothecium verrucaria*, sulfhydryl oxidizing enzyme in, 230
—, resistance of, to ethylene oxide, 242
Sporulation of *Bacillus coagulans* var. *thermoacidurans*, requirements of, 34
Staining bacterial smears with fluorescent antibody, 357, 362
Staphylococcus aureus, phagocytosis of, electron microscopic study of, 736
— phages, electron microscopy and serology of, 847
Staphylophage, action of aklavin against, 90
Steady-state growth of group A streptococcus, 283
Streptococci, inhibition of oral lactobacilli by, 690
Streptococcus bovis, effect of CO_2 on polysaccharide production by, 209
— *faecalis*, acetate requirement of, 101
— —, effect of citrovorum factor and folic acid preparations on, 373
— —, utilization of dihydrothymine by, 105
—, group A, growth of, in steady state, 283
— *pyogenes*, disintegration of by shaking with glass beads, 27
Streptomyces bobiliae, cell wall preparations of, 865
— *cyaneus*, heterokaryosis in, 219
— *fradiae*, cell wall preparations of, 865
— —, studies on cell wall of, 478
— *griseus*, cell wall preparations of, 865
— —, characteristics of bacteriophages for, 378
— —, heterokaryosis in, 219
— —, utilization of carbohydrates by, 214
—, heterokaryosis in, 219
— *venezuelae*, biosynthesis of chloramphenicol by, 153
Streptophage, action of aklavin against, 90
Succinate, role of, as precursor of propionate in propionic acid fermentation, 142
Succinic dehydrogenase in *Mycobacterium avium*, 754
Succinivibrio dextrinosolvens nov. spec., characteristics of, 22
— nov. gen., characteristics of, 22
Sulfhydryl groups in bacteria, relation to gram stain, 337
— oxidizing enzyme in spores of *Myrothecium verrucaria*, 230
Surface membranes of *Bacillus megaterium*, gram reaction of, 721
Synchronization of division of a thymineless mutant of *Escherichia coli*, 115
Synchronous culture of *Escherichia coli*, biochemical aspects of, 821

Thermobacterium acidophilus, a new factor for, 519
Thom, Charles, (1872–1956), necrology of, 725
Thymineless mutant of *Escherichia coli*, synchronization of division of, 115
Thymine-requiring strain of *Escherichia coli*, studies on, 570
Transduction in *Serratia marcescens*, 582
Transformation in *Serratia marcescens*, 582
— of virulence in *Agrobacterium tumefaciens*, 308
Transforming principle of *Haemophilus influenzae*, inactivation of, by mutagenic agents, 1

Tricarboxylic acid cycle activity in *Acetobacter pasteurianum*, 418
— — — inhibitors, modification of pullorum disease by, 620, 624
— — — intermediates, oxidation of, by *Acetobacter peroxydans*, 195
— — —, significance of, in oxidation of acetate by *Penicillium chrysogenum*, 436
Trichosporon cutaneum, urease test for, 127
— *pullulans*, urease test for, 127
Triose phosphate dehydrogenase in *Propionibacterium pentosaceum*, 610
Trypsin, activation of type E botulinum toxin by, 455
Tubercle bacilli, biochemical differences of, when grown *in vivo* and *in vitro*, 132
Tuberculostearic acid, growth of a mutant of myobacteria on, 813
Typing of *Mima polymorpha*, 728

Ultraviolet, effect of, on genetic transfer in *Serratia marcescens*, 582
— inactivation and photoreactivation of Azotobacter, 184
—irradiated *Escherichia coli*, cytological analysis of, 461
— — — —, reactivation of, 329
— light, desensitization of *Escherichia coli* to, 124
— —, inactivation of transforming principle of *Haemophilus influenzae* by, 1
— radiation of *Escherichia coli*, increase in resistance to, by presence of catalase, 494
— resistance, variation in, 95
Urea-lactose agar, a new differential medium for Salmonella, 278
Urease test for identification of yeasts, 127
Uric acid, metabolism of, by *Clostridium acidiurici*, 199
Uronic acids, utilization of, by *Serratia marcescens*, 834

Valine adapted *Salmonella gallinarum*, antigenic analysis of, 615
Variant, maltose-fermenting, of *Clostridium hemolyticum*, 809
Veillonella species, medium for, 533
Vibrio comma, recovery of, from water by membrane filter technique, 869
— *fetus*, effect of gaseous environment on growth and catalase content of, 397
Virulence of *Bacillus anthracis*, method of testing, 666
— — *Salmonella typhosa* grown in continuous culture, 168
—, transformation of, in *Agrobacterium tumefaciens*, 308
Virus, adenopharyngoconjunctival, complement fixing antibodies for, 568
—, influenza B, inhibition of multiplication of, 42, 54, 59
— neutralizing antibodies, procedure for adsorbing, on paper disks, 572

Water, effect of, on death rate of *Serratia marcescens*, 368
—, isolation of *Mima polymorpha* from, 870
—, recovery of *Vibrio comma* from, by membrane filter technique, 869

Xanthine, metabolism of, by *Clostridum acidiurici*, 199
Xeroson, suppression of pneumonia by, 604
X-ray induced block in deoxyribonucleic acid synthesis in *Escherichia coli*, restoration from, 488
X-rays, effect of, on survival of bacteria and yeast, 422

Yeast, gene control of resistance *vs.* sensitivity to cadmium in, 796
—, glucose utilization by, inhibition by alcohols, 349
—, plating method for population studies of respiration deficiency in, 500
Yeasts, method for testing raffinose fermentation by, 793
—, secretion of nicotinic acid by biotin-dependent, 324
—, urease test for identification of, 127

Zygohansenula californica, secretion of nicotinic acid by, 324
